Serials

# Pears' Soap

I have found it  
matchless for the  
hands and complexion

*Adeline Patti*

Since using Pears'  
Soap I have discarded  
all others.

*Willie Langtry*

For preserving the Complexion, keeping the skin soft, free from  
redness and roughness, and the hands in nice condition, it is the  
finest Soap in the world.

*M. Fortescue*

# **BERKLEY'S** **Fever and Ague Medicine.**

**AGUE CURED IN 48 HOURS.**

**T**HE never-failing success of this remedy has induced the Proprietors to introduce it to the public. For convenience of those residing in the interior, the medicine is put up in convenient form. The trial of one bottle will prove its virtue as a remedy for the disease for which it is specially intended.

*DOSE:—Two teaspoonfuls to a wine-glassful of water, at 10 a.m. and 4 p.m. and at bedtime. In doses of 10 drops, three times a day, in water, the Mixture will be found a Valuable Tonic.*

## **TESTIMONIALS.**

*The following Extract from Mr E. B. KENNEDY'S book, "Four Years in Queensland," will suffice to show the value of this Medicine:—*

"There are numerous Fever and Ague Medicines advertised; but I cannot, in justice, quit this subject without recommending that made and sold by Mr. BERKLEY, of Queen-street, Brisbane. I took some into the bush in a concentrated form; a few drops completely cured the disease in every instance in which I tried it, and often prevented its coming on. No one should be without it, and he should guard that glass bottle as his life in all his wanderings.

*Mr. JOHN P. SHARKEY, Surveyor, writing from the Herber River, says:—*

"Kindly send by bearer a bottle of BERKLEY'S MIXTURE (Fever and Ague); it is the only thing doing me any good."

STEAMSHIP "GOVERNOR CAIRNS,"  
COOKTOWN, July 16th, 1886.

MESSRS. BERKLEY, TAYLOR, & Co.,  
WHOLESALE DRUGGISTS, BRISBANE.

DEAR SIR,

I have now used your "BERKLEY'S FEVER AND AGUE MIXTURE" in New Guinea for some time, and am happy to say that in no case of New Guinea Fever has it failed to cure.

I have treated some very severe cases; one case in particular struck me as very remarkable. A Missionary Teacher had been ill of Fever and Ague for six weeks, and was so exhausted when I saw him that I despaired of his life; but after only two doses of your Medicine a decided change for the better took place, and after two days he was as well as ever, although very weak. So you see your Medicine is really very effective. I have used it in about 10 or 12 cases, and am very willing to certify to its efficacy in any form you like.

You may use this letter if you choose.

I am, Dear Sir,

Yours truly,  
(Signed) H. LILJEBLAD,  
Commander.

PREPARED ONLY BY

**PROSSER, TAYLOR, & Co.,**  
**Wholesale Chemists & Druggists,**  
**BRISBANE.**

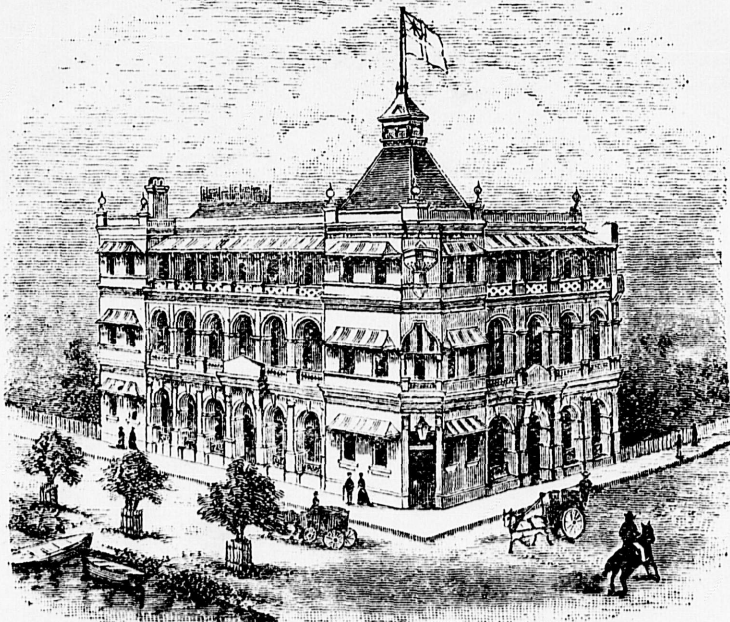

To be had Wholesale of the Proprietors, or through any of the Merchants in Brisbane, and Retail from all Druggists and Storekeepers.

# CRITERION HOTEL,

CORNER OF

QUAY & FITZROY STS., ROCKHAMPTON.

—A PALATIAL HOTEL—

SINCE last year Rockhampton has been remarkable for the Hotels being erected. Notable among them is the new Criterion. This imposing building occupies the vantage corner of Quay and Fitzroy Streets. This building is three stories high; its sight is almost unrivalled; it faces the river, giving in the warmest day a nice cool breeze. Travellers from the Southern Colonies speak loudly in praise of the Criterion Hotel and its worthy proprietress. Especial features of the above Hotel are the cooking and the attendance. The *Chef-de-cuisine* is a thorough artist, and the attendance is remarkable for its politeness and promptitude. A Splendid Smoking Room is fitted up with every comfort on the upper storey, so as to give smokers a nice cool room in which to enjoy their evenings.

Rockhampton,

December 31st, 1890.

*To the Residents of Central Queensland.*

*I have great pleasure in presenting you with my "Central Queensland Almanac and Domestic Annual" for 1891.*

*I have again to thank the Heads of Government Departments Secretaries of Institutions, Societies, Clubs, &c., for providing me with the information for which I have applied to them.*

*I should esteem it a favor if any of my readers, who may detect an error, would call my attention to it, and would offer any suggestions as to the inclusion of other matter of public interest.*

*Trusting that the Almanac will prove useful as a Book of Reference and Household Guide,*

*I am,*

*Yours very truly,*

*E. CHAS. BLAKE.*

## CENTRAL QUEENSLAND

COMPRISES that part of Australia which lies between the parallels  $21\frac{1}{2}$  and 25 south latitude (this is only approximate, as the dividing lines are irregular. The boundaries at present accepted, being those defined in the "Real Property (Local Registries) Act of 1887," having Cape Palmerston and the Dawes Range as the northern and southern coastal extremities, respectively), and stretches from the South Australian border on the west to the Pacific Ocean on the east. Its length from east to west is about 940 miles, and depth from north to south about 240 miles, the total area being 223,240 square miles, which is 31,000 square miles less in extent than the Northern Division, and 35,000 square miles greater than the Southern. The population of Central Queensland was on the 31st December, 1888, 46,590, and is now about 50,000. The settlement of this territory may be said to date from 1855 when the town of Rockhampton was founded, though at that time Gladstone had been settled for nearly ten years, and two or three stations had been formed in the district. During the past thirty-five years many changes have taken place, and only a small number of the old pioneers remain to tell the story of the early days when the country was first taken up.

Since then rapid advances have been made. At the present day the Central Division has double the population that was in the whole of the colony when Queensland was separated from New South Wales in 1859. The revenue is three times as great as the whole of the revenue of the colony at that date, and is about £11 10s. per head of the population; it would be still more than this if revenue now credited to Brisbane were, as it should be, credited to the Central Division; notwithstanding this, the revenue is now £3 more, per head of population, than in the Southern Division. The exports are at least five times as great as were the total exports of the colony at the same time. The land on the coast was at first occupied for sheep farming, &c., but its unsuitableness being proved, the western lands were taken up, the sheep transferred and replaced by cattle, so that all the land within a distance of at least 100 miles of the coast is now used for grazing purposes only. The number of sheep in Central Queensland at the end of 1889 was 7,053,041, this being, within a small fraction, a half the total number in the colony. The number of cattle was 1,586,956, or a third of the total number. The exports from the port of Rockhampton alone amounted to £2,446,471, almost equal to the combined exports of Brisbane and Townsville, and one third of the total exports of the whole colony. The production per head of the population is about £50 as opposed to £7 10s. per head in the Southern Division; this sum per head of population is probably unequalled in any community, of the extent of Central Queensland, in any part of the world. The exports for the year ending September 30th, 1890, amounted to £2,006,791, being less by £439,980 than for the previous twelve months. The reduction in the quantity and value of wool exported may be justly attributed to the excessive rainfall in the early part of the year which interfered with shearing operations, and rendered the roads for so long impassable, that the carriage of the wool was delayed to a much later period than usual. The clip for 1890 has been a larger one than in the previous year, and the later arrivals of wool may yet give a satisfactory return for the year past. Gold also shows a falling off, but still the quantity raised in the district and exported from Rockhampton, is far in advance of any goldfield or port in the colony. The preserving of meat has for many years been a staple

## Only the Purest Drugs used in Dispensing.

industry, and has during the abovementioned period (twelve months ending September, 30th, 1890), shown a considerable increase on the quantity exported during the previous term. To this is now added the exportation of beef and mutton in a frozen state. During the twelve months above stated, 3,664,820lbs. of frozen beef, and 3,380,992lbs. of frozen mutton, valued at £49,636 and £41,461 respectively, were exported from Rockhampton, the whole of this quantity being sent from the works of the Central Queensland Meat Export Company, at Lake's Creek. The prices now ruling in the home markets are not such as to yield a return, giving the squatter a sufficient profit, after deducting the expenses of freezing, freight, &c. But it is hoped that as further facilities are obtained in the Old Country for the storing and carriage of meat, so that it may be offered to the public in the best possible condition, much of the existing prejudice against Australian frozen meat will be overcome, and the resulting demand will raise the price to a satisfactory point. The imports for the year ending September 30th, 1890, are less by £54,660 than in the previous period, and show a smaller return than for several years past. This falling off may be attributed to general conditions prevailing throughout the colony, as other ports show a similar reduction. The country has not yet had time to recover from the disastrous seasons which preceded the breaking up of the last drought, and it yet remains for the full effect of the present promising time to be felt. In other respects, the year 1890 in Central Queensland may be regarded as a memorable one, more especially with reference to the rainfall, which is in excess of any year since records have been kept. Not only was the quantity registered exceptional, but the consistent manner in which it was distributed, and the many days on which rain fell, have secured for the pastoralist and agriculturist complete immunity from present risk and an ample promise of an exceptionally favourable season in the immediate future. As a consequence of the heavy rains which fell in the first three months of the year, floods were general throughout the colony. Brisbane, Bundaberg, Maryborough, Rockhampton, Townsville, and other coastal towns were in turn inundated, and the whole of the Western Country, of low elevation, was converted, by the overflowing rivers, into an inland sea. But though serious loss of life and property was reported from other parts of the colony, the Central District was singularly fortunate, and with the exception of the injury to the Fitzroy Bridge, the loss occasioned may be considered as trivial when compared with the great good to the community likely to arise from such a generous rainfall. A natural result of such heavy and extensive rain was almost total suspension of railway communication and other means of transit. On several occasions, and for a considerable period, passengers had to be conveyed over portions of the Central Railway by means of boats, while the outlying districts, apart from the railway line, were entirely cut off from their usual points of communication. During the year rapid strides have been made by the Separationists, and the movement, which was resuscitated in September, 1889, after lying dormant for twenty years, has now attained such proportions that the ultimate success seems much nearer realisation than even the most sanguine Separationist could have hoped. The demand for Separation, pure and simple, may be affirmed to be unanimous, every township and every centre of population having declared for it, and there is no opposition, that which existed at first having entirely disappeared. Twelve branches have been formed, and the division has been systematically canvassed for signatures to the petition to Her Majesty the Queen. On October 31st, 1890, 7727 signatures had been obtained; since then a supplementary petition has been signed by 1005 persons, making the total signatures received 8732, which represents nine tenths of the adult population of Central Queensland, and certainly an equal proportion of the intelligence and wealth of the district. An influential committee has been formed in London, the members of which have displayed that same zeal and assiduity that has been shown here and has brought the movement to its present position.

**Blake's Certain Cure for Fever and Ague, price 5s.**

No important discoveries of gold have been recorded during the year, but several of the pre-existing properties, more especially the celebrated Mount Morgan Gold Mine, have been worked with more or less satisfactory results. During the year a seam of coal, at the Blair Athol Coal Mine, about ten miles from Clermont, which was discovered some twenty years ago and has since been almost forgotten, was opened up with most gratifying results. In the latter part of the year over 3000 tons of coal have been raised and delivered in Clermont, for the use of the Central Queensland Railway. As a steaming coal that derived from the Blair Athol mine is acknowledged to be equal to any coal in the world; the seam is remarkably even and free from faults or flaws. The only drawback to the further development of this property is the want of a railway connecting with the terminus at Clermont; should this difficulty be overcome it may reasonably be expected that the Central District will be placed on an independent footing so far as the coal supply is concerned. Other coal seams are known to exist in the district, but the obstacles placed in the way of development, owing to the distance they are situated from railway or water communication, have as yet proved insurmountable. Agriculture remains in much the same state as before, with the exception of the benefit derived from the favourable season. Portions of the district have been examined and reported upon with a view to irrigating, but up to the present no definite scheme has been formulated. The practice of boring for artesian water has been vigorously carried out and is likely to receive still further attention, though the exceptional rainfall has for the time being obviated the immediate necessity of such measures.

The railway service of the Central District, though not so extensive as in the Southern Division, is, owing to the conformation of the country, of more practical use to the people, and would, with the further extension of the line towards the west, and the construction of short branches north and south, place all parts of the Division within measurable distance of railway communication. The extension to Longreach has already been completed, as far as the twenty-one mile bore (Artesia Township), the other portion being in course of construction. With the opening of this extension, the port of Rockhampton would be placed in direct communication with the main stock route of Central Queensland, and with several of the stations lying on the further side of the Thompson River, over which a road for carriers has recently been formed. The route from Gladstone to Rockhampton has been permanently surveyed, and surveys have also been made for connecting the Central Queensland and Emu Park Railways, for a branch from the Emu Park Line to Yeppoon, and for a line from Mount Morgan connecting with the main line at Kabra, but the present state of the exchequer is likely to hinder these undertakings for the present, with the exception of the Mount Morgan Line, which is to be constructed by the company owning the gold mine. The question of a railway to deep water, though accepted as an essential requirement has, for the time, been shelved, and, when it is reconsidered, the port to which a railway shall be built has to be decided upon; at the present time opinion is almost equally divided between Port Alma and Broadmount. Central Queensland standing in the prominent position as first among the three Divisions, owing to its vast flocks and herds, and rich gold producing country, and having the advantage of the same propitious seasons that have visited the whole of Australia, should continue to progress, and with the attainment of Separation, the people would be stimulated to further efforts, inducement would be offered to capitalists to assist in the development of industries, settlement upon the land in favourable districts would become more general, while the sole control of these matters would be placed in the hands of those who are directly interested, viz.—the inhabitants of the district in which we live.

**Clark's Pyramid Night Lights, boxes containing 8 lights, 1s 6d each**

## Country Orders Receive Prompt Attention.

Central Queensland is represented in the Legislative Assembly by the following members:—Rockhampton, Hon. W. Pattison, A. Archer, Esq.; Rockhampton North, Rees R. Jones, Esq.; Barcoo, F. B. Murphy, Esq.; Clermont, J. Stephenson, Esq.; Fitzroy, A. J. Callan, Esq.; Gregory, W. H. Corfield, Esq.; Leichhardt, W. S. Paul, Esq.; Mitchell, Jas. Crombie, Esq.; Normanby, J. Murray, Esq.; Port Curtis, A. Norton, Esq.

The time of high water at the following places relative to the time of high water at Rockhampton:—

Broadsound	..	..	..	..	45 minutes earlier
Emu Park	..	..	..	2 hours	30 minutes earlier
Keppel Bay (Pilot Station)	..	..	..	2 hours	40 minutes earlier
Pioneer River (Mackay)	..	..	..	..	52 minutes earlier
Port Curtis (Gladstone)	..	..	..	2 hours	30 minutes earlier

To find the difference in time between Rockhampton and any place west of Rockhampton, add 4 minutes to Rockhampton time (as given in calendars) for every degree of longitude:—Aramac,  $145\frac{1}{4}$ ; Rockhampton,  $150\frac{1}{4}$ ; difference,  $5\frac{1}{4}$  degrees, equal to 21 minutes.

**Clark's Pyramid Night Lights, boxes containing 8 lights, 1s 6d each**

I HAVE great pleasure in informing the Public that I have taken into Partnership Mr. J. P. J. GORDON, Pharmaceutical Chemist, Queensland (by examination) and New South Wales, and that the Business will in future be carried on under the style or firm of BLAKE & GORDON.

E. CHAS. BLAKE,

January 1st, 1891.

---

NEW FIRM.—From our advertising columns the fact will be gathered that an important alteration has been effected in the business hitherto carried on under the title "E. Chas. Blake, Pharmaceutical Chemist." Mr. Blake has found his *clientele* become so extensive that he was no longer able, single-handed, to cope with the trade. He has, therefore, taken into partnership with him Mr. J. P. J. Gordon, who, for the last two years and a half, has acted as his assistant. Mr. Gordon, who, is a native of this district, has had a wide and varied experience in Pharmacy theory and practice in various parts of the colony. He is also a registered Pharmaceutical Chemist of New South Wales. Mr. Blake, on his part, is the only Chemist in Central Queensland who has passed the Pharmacy Board examinations with honours. The new firm should, therefore, set sail under the most favourable conditions, and should certainly continue to receive a larger share than ever of the wide public patronage hitherto accorded to Mr. Blake.—*Daily Northern Argus*.

## REGISTRATION OF BIRTHS, MARRIAGES, AND DEATHS.

Every Birth must be registered within sixty days, and every death within thirty days next thereafter respectively; any neglect of this regulation renders the party whose duty it is to register, liable to a fine not exceeding £10. If sixty days have elapsed from the date of birth, the law requires the parent, or other person making the application, to register such birth, to pay a fee of two shillings and sixpence, and to make a solemn declaration of the facts before a Justice of the Peace, prior to the registration. If possible in all cases the

"The Burglar's Horror" is Clark's Night Light Lamps 1s 6d each.

Clement's Tonic, price 4s. per bottle.

father or mother ought to sign as informant. If unable to write, let a mark be made. No birth can be registered after three years have elapsed from the date thereof; but a record will be made in the Registrar-General's Office if information be supplied respecting such a birth.

Every Minister who has celebrated a marriage, must within one month thereafter transmit (in accordance with the Act 28 Victoria No. 15) the original certificate to the Registrar of the District in which the marriage was celebrated, and every Minister who fails to transmit the certificate to the District Registrar, is liable to a fine of NOT LESS THAN £10 and not exceeding £50. Marriages must be solemnised between the hours of 8 a.m. and 8 p.m. Persons under age must produce the written authority of parents or guardians, signed by them in the presence of a Justice of the Peace, Registered Minister, or District Registrar, or the marriage cannot take place.

In every case of Burial, the Minister or person officiating at any religious service at such burial, ought to receive from the undertaker or person having charge of the funeral, a certificate from the District Registrar, certifying the registration of the death, unless in the case of inquest, when a certificate from the Coroner or Magistrate holding an inquest, will be sufficient; and if any dead body shall be buried without such certificate, the person who may bury the same, or perform any funeral or religious service for the burial, or who shall in any way dispose of the body, shall forthwith give notice of the facts to the District Registrar. Undertakers are bound, under a penalty not exceeding £10, to lodge with the District Registrar, IMMEDIATELY after the burial, a Certificate of such burial signed by themselves and COUNTERSIGNED BY TWO WITNESSES.

<i>Provisional School Teacher:</i> Miss E Ilott	

### Aramac.

A post town, with Money Order, Savings Bank and Telegraph Offices, situated on a beautiful site surrounded by magnificent downs on the Aramac Creek, a tributary of the Thompson River, 390 miles from Rockhampton, and 42 miles from Balcaldine. The surrounding country is taken up by sheep runs; several homestead farms and grazing farms have lately been surveyed. Boring has been successfully prosecuted during the past year. A large supply of water was obtained by the Divisional Board, at a depth of 650 feet, nine miles from Aramac, on the Barcaldine Road. A bore put down on the Leichhardt selection yields a supply of 1,400,000 gallons daily, and it is intended sinking in the township, where it is anticipated water will be found at a depth of less than 1000 feet. The town has lately shown signs of progress, several houses have been built, and others are in course of erection. Population 350; district 2500.

*Police Magistrate, Registrar, &c.:* E F Craven

*Land Commissioner (visiting):* Mark Borton

*Clerk of Petty Sessions:* Patrick Ryan

*Poundkeeper:* W F Thompson

*Churches:* Church of England, Roman Catholic

*State School:* Head teacher, Chas. Kemp; attendance 39

*Hospital:* Surgeon, Dr Hewer; warden and matron, Mr and Mrs Morley

*Aramac Jockey Club:* Hon. Secretary, J W Booker

*Mitchell District Pastoral and Agricultural Society:* Secretary, Sydney Sharwood

*Aramac Divisional Board:* S P Fraser, chairman; S Sharwood, secretary

**Clark's Pyramid Night Lights, boxes containing 8 lights, 1s 6d each**

## Sole Agent for Martin's Homœopathic Medicines.

---

### TRADES AND PROFESSIONS.

*Erated Water Makers*: Sutherland and Duke

**Blackall.**

A municipal borough (incorporated May 20, 1880) with Money Order, Savings Bank, Post and Telegraph Offices, situated on the Barcoo River, in the centre of a pastoral district, 380 miles west from Rockhampton, and 60 from Barcaldine on the Central Railway. The estimated area of the municipality is 3200 acres, having six miles of roads, 140 dwellings and property of the rateable value of £48,000. The Blackall bore put down in 1888 yields 280,000 gallons of water daily from a depth of 1675 feet. Population of the municipality about 850; of the district, 1675. There are several selections and grazing farms in the district.

*Police Magistrate, Clerk of Petty Sessions, Commissioner of Affidavits, Registrar and Returning officer:* Wm. J Hartley

*Town Council:* Mayor, P J Phillips; aldermen—J Dash, A J Haylock, E G Olen, E H Wicker; Town Clerk, P A Aitken

Blake's Electric Liniment cures Rheumatism.

---

### Calliope

Is situated on the Rockhampton road, 15 miles from Gladstone. It was for a considerable time an alluvial goldfield, but of late years reefing has been carried on with variable success. Recently a local company has commenced work on a property known as the Calliope Freehold Gold Mining Company, Limited (Hawthorne and Co., Secretaries), and reefs in other parts of the district are being worked by a Foreign syndicate (G Orange, Secretary). There are three saw-mills in the vicinity, one of which is on the Calliope River, which is navigable to within five miles of the township. A School of Arts and Police Court have recently been erected; population about 300.

*Churches* : Church of England (visits) ; Presbyterian (visits monthly)

*Cricket Club* : Secretary, S Hawthorne

*School Teachers* : Mr Clark. Miss Old

### Cawarral.

A mining township, 20 miles from Rockhampton. The Emu Park railway passes within four and a quarter miles of the township. A conveyance runs between Cawarral and Tungamull, the nearest railway station. Claims are being developed in the district; the Greek's Reef, out of which several thousand pounds worth of gold was taken upwards of 20 years ago, is now being worked on tribute. The property recently in the hands of Mr Kearney has been taken up by a home syndicate with a view to its further development. The Galawa claim, also situated at Mount Wheeler is likely to be worked more extensively at an early date. The Annie and Last Chance have recently been worked by a company, who erected an extensive amalgamating plant, when it was found that chlorinating was not satisfactory, owing to the excessive quantity of lime contained in the ore. The crushing of the stone is carried out on similar lines to the plan adopted at the Mount Morgan gold mine, and the powdered ore is subsequently passed through Arastra Pans where it is ground, then through an agitator where it is brought in contact with the quicksilver, and afterwards through Berdan Pans, where it is re-ground before being finally passed over the blankets. By this process only a small percentage of the gold contained in the stone is wasted. Owing to the company having obtained exemption from work for six months on the Annie, the number of men employed has been reduced from 89 to 27, and as most of those thrown out of work have found it necessary to leave the district, the township is not at present in that flourishing condition which was so marked during the early part of last year. A railway has been surveyed connecting Yeppoon with the Emu Park Railway via Cawarral, but its construction is still undetermined.

### Clermont.

A municipal township (proclaimed January 21, 1867) in the Leichhardt district, having a Money Order office, Savings Bank, Telegraph and Railway Station, about 226 miles north-west of Rockhampton, it is the terminus of the branch line from Emerald. The celebrated Peak Downs Copper Mines, discovered in 1862, are four miles from the town; but are now lying idle, owing to the low price of copper. The surrounding country is auriferous, and coal is now being raised at Blair Athol, 12 miles from Clermont. The district is pastoral; population of town, 1109; district, 4860.

*Municipal Council:* Mayor, John McCarthy; aldermen—Benno Behr, Thomas Foden, W. H. Griffin, C. Neidermeyer, H. H. Thompson; Town Clerk, F. Leysley.

*Police Magistrate, Returning Officer, Gold Warden and Land Commissioner:* Edmund Morley

### Emu Park

Is a natural watering place about 29 miles east of Rockhampton. Until the railway was constructed the means of communication were not sufficiently convenient to allow of many enjoying the pleasure of a trip to the sea-side, but since the opening of the line, which was completed in December, 1888, large numbers have made it their place of summer residence, or occasional resort. The liberal arrangements which have recently been made by the Railway Com-

"The Burglar's Horror" sold by E. CHAS. BLAKE.

# COMLEY'S HOTEL,

## EMU PARK.

This old-established and popular Hotel has recently been completely renovated, and fitted with all the modern improvements available, and large additions have been made to the sleeping accommodation and culinary departments.

Comley's occupies the most central and convenient site in Emu Park, being immediately opposite the Railway Station, and close to the Post and Telegraph Offices, and within a few yards of the beach. From the spacious Balconies, fine views are obtained of the Bay and Islands, and of the surrounding country. The cooling breezes from the Pacific play along the whole length of the building, which is well-sheltered from mid-day heat.

The BEDROOMS are large, airy and most comfortably and conveniently furnished.

The TABLE has gained the reputation of being one of the best in the colony, and the attendance as good as can be procured.

From his long experience, the proprietor is enabled to select only the

**PREMIERE HOTEL OF EMU PARK.**

Blake's Preservine renders the hottest day innocuous

---

missioners allow of those who are engaged in business in Rockhampton during the day spending their unoccupied time by the sea-side. Season tickets can be obtained for one month at a considerable reduction off the ordinary fares, and for longer periods at a still greater reduction. To those who do not require season tickets, return tickets are offered at favorable rates. Every facility is afforded at Emu Park for sea bathing, which can be enjoyed with perfect safety. Emu Park possesses four large hotels, all advantageously situated, which are equal in every respect, if not superior to the hotels of other watering places in Australia. The large numbers who now take advantage of every holiday to make a trip to the Park, conclusively prove the popularity of this delightful resort, which is rapidly growing in public favor. Anyone who seeks for relaxation from the strain of business life, or who feels the want of a change from the monotony of the bush will find all they desire in a stay at Emu Park. In addition to the stimulating effect produced by the invigorating Pacific breezes, they can have all the comforts and conveniences of a town residence, and can choose as they desire either the uninterrupted quietude which some prefer, or the pleasure to be obtained in the society of other visitors.

## Gladstone.

A seaport on the shores of Port Curtis, about 354 miles north-east of Brisbane, and 91 south-west of Rockhampton. It was settled in 1846, and is therefore one of the oldest places on the coast. The Hon. M. C. O'Connell was appointed Government Resident, and arrived in Gladstone in March, 1854. The harbor, which is reputed to be the best in Queensland, is spacious, deep, and well sheltered. A new jetty has recently been erected, at which there is 26ft. of water at low springs; vessels drawing upwards of 24ft. can anchor in Auckland Creek, close to the town. From 1865 to August, 1867, upwards of 38,000 cattle, valued at £150,000 were shipped from Gladstone. It is anticipated that the export of cattle to New Caledonia will shortly be renewed. Several large vessels, including some of Her Majesty's navy, have taken advantage of the facilities of the harbour to repair damages. The railway connecting Gladstone with Bundaberg is now in course of construction; the earth-works have been completed, and plate-laying will be started forthwith. The railway bridge crossing the Boyne River will have a total length of 2196ft., being the longest bridge in the colony. The foundations of the bridge are nearly finished, and it is anticipated that the whole of the railway will be open for traffic at the end of the present year. The distillation of the oil of the citron-scented eucalyptus, which grows abundantly in the district, is carried on by Mr. A. J. Timbury. The favorable reception accorded this oil has compelled the manufacturer to make considerable additions to his plant. He has fortunately been successful in obtaining water by boring. As the demand increases, this important industry should prove of great benefit to the town and district. A weekly service is carried on by the A.U.S.N. company from Brisbane, Bundaberg, and Rockhampton; the tender Emily May meets the coast mail steamers, North and South, on Sunday and Tuesday respectively. A special dredge has been constructed for deepening The Narrows, which will improve the means of communication between Keppel Bay and Port Curtis. There is a weekly coach service between Gladstone and Rockhampton. The municipality contains five miles of streets, 108 dwellings; the estimated value of rateable property is £45,780; population, 400; census district, 1800

Customers residing in the Country are requested to give the name of  
some Rockhampton firm as reference, when it is not convenient to send  
remittance with order. To save delay it is advisable to mention the route  
by which goods are to be sent: if by Post, the name of the nearest Post  
Town should be given. Letter rate viz, 2d. per  $\frac{1}{2}$ oz. is charged on all  
medicines. Liquids of a dangerous nature cannot be sent through the post.

### Longreach.

A township 426 miles west from Rockhampton on the Thompson River, adjoining a permanent water hole 12 miles long and correspondingly wide and deep. The C. Q. Railway is now being extended from Barcaldine, and it is probable that Longreach will become a permanent township owing to its favourable position, and being situated on the main stock route of Central Queensland. Several business and private houses are in course of erection, and other signs of rapid progress are evident. The surrounding country is being taken up and fenced with a view to utilising it for grazing and agricultural purposes.

*Longreach Progress Association*: W H Meyers, Chairman; Jas. Cronin, Hon. ec.

*Longreach Jockey Club*: W McMillan, President; Jas. Cronin, Vice-President; J E Rees, Secretary

*Police*: Senior-Constable Blyton and two constables

### Mount Morgan

Is situated about 26 miles S.S.W. from Rockhampton, from which place it can be reached by either of two routes, viz., from Rockhampton by rail to Kabra (10 miles) and thence by coach, or by coach direct by way of the Crocodile goldfield. The Mount Morgan Gold Mining Company intend constructing a railway connecting with the main line at Kabra; the proposed route has been surveyed, though the means of overcoming difficulties by the way have not yet been devised. Mount Morgan was formed into a Municipality in May, 1890, when Mr J. Wesley Hall was appointed Mayor, and Mr E. H. L. Eastwood Town Clerk. Population estimated between 4000 and 5000. The Mount Morgan hospital was opened during the past year, and has proved of great benefit to the employees of the company and the residents of the township and district. There are several imposing public buildings, including a School of Arts, Foresters' and Oddfellows' Halls, Athletic Hall and places of worship erected by the several denominations. The celebrated mine, from which the township takes its name, still stands pre-eminent, though the amount of gold produced during the past year was less than in the year previous. Upwards of 1500 tons of ore are treated weekly, and dividends of 1s and upwards have been paid monthly on the 1,000,000 shares of the company. Between 850 and 900 men are employed on the works, which are lighted by electricity and fitted with telephonic communication; work is carried on day and night without intermission, and all possible means employed to save delay. Several claims and mines owned by foreign syndicates have been worked in the district, but without success. At the Two-mile, one or two claims have been worked in a small way, yielding a profit, but not sufficient to justify a large outlay of capital. The *Mount Morgan Chronicle and Mining Gazette* is published every Saturday morning.

## Complete Assortment Perfumery & Toilet Requisites

### Norton.

A mining township, with Post Office, situated on Wattle Creek, a tributary of the Boyne River, 47 miles south-west of Gladstone, and 32 miles from Calliope, population about 170. The Conran's Gold Mining Company have a chlorinating plant with a 10-stamp battery, 4 calcining furnaces, and 4 chlorinating barrels capable of treating 150 tons of ore per week. The ore is refractory, and the difficulties experienced in the past have caused such a large expenditure of funds, that it is probable that work will be stopped for a time until the company have re-arranged their affairs. On Mr. Carmichael's works there is an 11-stamp battery, 1 chlorinating barrel, and 1 calcining furnace, 50 feet in length. Mr. Martin Gondolph works one Arastra pan on improved lines; water being the motive power utilised. The Advance Company have a shaft 490 feet deep with steam winding machinery. Other claims are being worked in the district.

*School of Arts*: A Norton, M.L.A., President; T Conran, Vice-President; W Carmichael, Treasurer; W K Hounsham, Secretary and Librarian

*Provisional School Teacher*: W K Hounsham; attendance, 30

### St. Lawrence.

A post town, with Money Order, Savings Bank, and Telegraph Office, situated on the southern bank of the St. Lawrence Creek, about six miles from the head of Broadsound, and 120 north of Rockhampton. The district has been taken up for grazing; some of the surrounding country would be admirably suited for agricultural purposes. The steamer Taldora leaves Rockhampton for Broadsound as inducement offers. Population, 200: census district, 1400. St. Lawrence is the port for the Yatton Goldfield, which is 35 miles west, also for the Carmilla Silver Mines 45 miles north on the Mackay Railway route.

## Winton,

Commonly called the "City of the Plains," is a post town, with Money Order, Telegraph, and Savings Bank Offices, situated on the Western River, 150 miles from Barcaldine, and 143½ miles from Hughenden. It is in the centre of a magnificent rolling downs country ; the soil, if adequately watered, would produce valuable crops. A Government bore is now being put down, and if successful, will materially add to the prosperity of the town, which has been in a thriving state, notwithstanding the recent depression.

## Yeppoon

Is a watering place situated about 26 miles north-east of Rockhampton. It has for many years been a favourite resort, but lately the railway to Emu Park has taken away a large number of its visitors; the railway passes within seven miles of the township; vehicles meet trains at Tanby to convey visitors to and from Yeppoon. Two railways have been surveyed connecting Yeppoon with the Emu Park line, the one from the township to Tanby, which is the nearest station, and the other via Cawarral, a much longer route. At present the construction of a line or the route to be taken has not been decided upon by the authorities. Yeppoon possesses a splendid beach, and sea-bathing can be enjoyed at any time. There are three hotels, a church, police station, school, Post Office, and about 100 habited houses. A little to the north of Yeppoon is the sugar plantation. The mill is capable of turning out 1000 tons of sugar, three years ago the output was upwards of 500 tons, and the crop for the last season was estimated to considerably exceed this quantity. There are 700 acres under cultivation.

*Yeppoon Progress Association*: President, Jas. Atherton; Vice-President, W Broome; Treasurer, J W Power; Secretary, F H B Croft

This Ointment has been used with unfailing success. It is rapid and certain in its action, and may be used with confidence when other healing agents have proved useless.

POTS 1s. 6d. EACH.

## ROCKHAMPTON,

THE capital of Central Queensland, is situated on the south bank of the River Fitzroy, about 30 miles from its mouth, 18 miles (in a direct line) from the coast, and 420 N.W. of Brisbane.

The town dates its origin from the advent of Mr. C. Archer, who with the late Mr. Risien and party, arrived at Gracemere in 1855, having travelled overland from the Burnett. Three years later the rush to the Canoona took place; though the field proved a comparative failure, and the majority of the people returned to the South, yet a sufficient number remained to make Rockhampton a township of some importance. In this year the town was laid out on similar lines to the city of Melbourne, and is admitted to be the best surveyed town in the colony. Starting from the river, the frontage to which has been reserved, affording easy communication with the shipping, and an excellent promenade for the inhabitants, the streets run to the Athelstane Range, the cross streets dividing the town into five-acre blocks. The principle streets are 99 feet wide, and several of them being planted with trees, will, in time to come, develop into umbrageous avenues. The lanes alternating with the streets which lie parallel with the river, offer great facilities for the conduct of business, and relieve the principal streets of much of the heavy traffic.

Rockhampton, as the port of Central Queensland, is the outlet of the Dawson, Peak Downs and Springsure Districts, and the extensive western lands watered by the Barcoo, Alice, Thompson, South Diamantina, Herbert, and other rivers flowing into the interior, which together comprise some of the richest pastoral country in Queensland. The exports from Rockhampton are upwards of £2,000,000 per annum, and in this respect constitute Rockhampton the principal port in the colony. At the present time the Central Queensland Railway terminates in the township, but the difficulties experienced in keeping open the thirty miles of river have made necessary the construction of a railway to deep water. The route to be taken, or the port to which the railway shall run, is still an open question. A railway has been surveyed connecting the Central and Emu Park Railways, crossing the river at a bridge to be constructed on "The Rocks" which lie like a natural dam across the stream about 400 yards above the Fitzroy Bridge. The town is governed by a Municipal Council (proclaimed, 22nd December, 1860) consisting of a Mayor and nine Aldermen, and is considered the model Municipality of the colony. The revenue has increased from £181 in 1860 to upwards of £28,000. The Municipality is 23 1-10th square miles in extent; there are 76 miles of roads and streets; the estimated number of dwellings is 2279, the estimated total value of rateable property £1,297,140, and the estimated population 13,674. The water supply is obtained from the Crescent Lagoon, the water being pumped to a reservoir on the Athelstane Range, 150 feet above the level of the town, and having a capacity of 1,300,000 gallons. The insufficiency of the supply in time of drought has induced the authorities to seek some additional and more permanent supply of this indispensable desideratum. Large sums have been spent in constructing drains and forming and channelling the streets, the result of which has been evident during the late rainy seasons, in the rapid disappearance of storm waters, and the total absence of epidemic fever.

Though it is situated within the tropics, Rockhampton has few, if any, of the disadvantages which are generally associated with a residence in Northern Australia. The climate, though tropical, in no way justifies the unaccountable and unenviable notoriety attached to Rockhampton, and a reference to the climatological tables published by the Meteorological Department will at once

## A large stock of genuine patent Medicines

disprove the assertion that Rockhampton is hotter than is warranted by its geographical position. The hot winds which sweep over the Southern capitals are unknown; the rainfall which is experienced within a few miles, only visits the town during the wet season; with this exception the climate is dry, the air is clear, and during the evenings throughout the year there is a total exemption from excessive heat. The death rate of Rockhampton during the year 1889 was lower than either Brisbane or Townsville, and below the general average of the whole colony.

Rockhampton possesses several handsome buildings, the majority of which have been erected during the past two or three years. The Anglican Church, situated in William-street, is universally admired, both on account of its architectural symmetry and admirable internal arrangements. The Court House, recently erected at a cost of £12,533 is a substantial building, facing East-street, between Denham and Fitzroy-streets, from which it is separated by land reserved for the purpose. The Theatre Royal, East-street, opened in 1889, is admitted by competent critics to be equal to any place of amusement outside of the Southern capitals; it is tastefully decorated, has excellent acoustic properties, is well ventilated, and is provided with ample means of escape in case of fire. The Queensland National Bank, at the corner of Quay and Denham-streets, and the Commercial Bank, East-street, are particularly noticeable in that their exterior appearance is directly in keeping with their importance as branches of large commercial institutions. On the Athelstane Range are situated the Port Curtis and Leichhardt District Hospital, the Boys' Grammar School, the Children's Hospital, Orphanage and Benevolent Asylum; to these is to be added the Girls' Grammar School, the funds to build which have been recently subscribed. The Central Boys' School, between William and Denham-streets, is a handsomely designed wooden structure, standing in the centre of the recreation grounds, which occupy the whole of the five-acre block on which the school is situated. The hotels of Rockhampton far surpass the buildings generally found in towns of this size. The Criterion, which has lately been erected on a site adjoining the old hotel, is favourably situated with an excellent view of the Fitzroy Bridge and picturesque scenery lying on the north side of the river. In its construction have been considered all the essentials of a first-class hotel, and though in size it may be surpassed by some of the hotels of the South, it can scarcely be excelled in perfection of detail. The Leichhardt, which is centrally situated at the corner of Denham and Bolsover-streets, recently was re-built and re-furnished in a sumptuous manner, and is now one of the most elegant buildings in the town, and one of the leading hotels in Queensland. The Palace and Market hotels, in East-street; the Union, at the corner of East and William-streets; the Queensland and Albion hotels, in William-street, are all substantial structures, and take their place among the leading hotels, which include several other hotels that would require especial mention in any place other than Rockhampton, where the standard of excellence has been raised to such a high level.

The Post and Telegraph Offices, now in course of erection on the site of the old buildings, at the corner of East and Denham-streets, will probably be the most imposing building in Rockhampton, and undoubtedly the finest public offices north of Brisbane. That portion of the building facing East-street, will have a facade of 300 feet, and will be partially separated in the middle by an entrance to the Court at the rear; in the centre of the building and surmounting the entrance will be a clock tower, rising to a height of 168 feet. On the Denham-street frontage, the building will be about 200 feet in length. Both fronts will be of stone obtained from the Stanwell Quarries, the remainder of the structure of brick faced with cement. The total cost will be about £16,000, and it is anticipated that the building will be completed by the end of the present year.

---

**Clark's Food Warmers sold by E. CHAS. BLAKE.**

Outside of the town are many places well worth a visit. The watering places, Emu Park and Yeppoon, mentioned elsewhere, are easy of access. Olsen's Caves, about 16 miles from the town, are a favourite resort for picnic parties, and afford enjoyment for the scientist or the pleasure seeker. Nearer home is Fairy Bower, which is considered to be one of the most attractive spots in the neighbourhood. The upper reaches of the river, a few miles above the town, are much frequented by boating parties. The Botanical Gardens and the Victoria Park are within walking distance, and are naturally favourable places for recreation. The sportsman will find ample fishing in the river or lagoons; in the season ducks and swans are generally abundant in the neighbourhood. The athlete need fear no scarcity of pastimes—football, cricket, rowing, cycling, running, &c., are all enthusiastically supported in Rockhampton.

The year 1890 in Rockhampton was a noteworthy one, in common with the Central District and the whole of the colony. The heavy rainfall of the first four months of the year caused the Fitzroy to rise in flood on several occasions, with the consequence of submerging the wharves and low-lying parts of the town. Though the floods of January and February were as severe as those usually experienced in a wet season, they were as nothing compared with the succeeding flood of March and April, when all the tributaries that drain the watershed of the Fitzroy into which their waters run, viz.:—the Mackenzie, Isaacs, and Dawson Rivers, and the Comet and Nogoia Creeks, were in flood at one and the same time. Inch by inch the waters rose, covering the surrounding land of inferior elevation, and gradually encroaching upon the business portions of the town. Houses had to be abandoned, and before the waters subsided some of them were completely submerged. On the 7th April, the waters reached their highest point, which was about two inches higher than the flood of 1875, and about the same distance below the flood of 1864. At this time a large portion of the town was inundated and the remainder entirely surrounded by the floods. A vast body of water, caused by the overflowing of the river at a point opposite the Eight-mile Island, was flowing over the low-lying flat country situated behind the Athelstane Range, the reserve lands on the north side of the river were many feet under water, and the roads of the district closed, except to boat traffic. Notwithstanding the immense quantity of water discharged from the tributaries of the Fitzroy and the vast extent of the floods, the loss of life and damage to property was comparatively *nil*. But as the waters subsided one of the cylinders of the Fitzroy Bridge, yielding to the strain that was put upon it by the rushing torrent, slipped from its foundation, with the result that the first span of the structure on the south side was robbed of its support and sank on its lower side until it was more than two feet below its former level. For a time the whole mass was in imminent danger, but the prompt measures taken to prevent further injury proved successful. The injury is now being repaired, and the structure should be restored to its former condition before the middle of the year.

In May the Governor, Sir Henry Wylie Norman, paid his first visit to the Central District. The brilliant reception accorded him on his landing on May 7th, was a gratifying proof of the loyalty of the people and their respectful admiration for one of Sir Henry Norman's proved ability and distinguished service. A banquet was given to the Governor on the following day by the Mayor, when a large company was present. A football match, concert, and a visit to Emu Park were also organised in his honour, but the latter had to be abandoned owing to Sir Henry Norman's enforced departure for Brisbane a day earlier than he had previously intended.

The Separation movement, which took its genesis in Rockhampton, has been one of the leading topics of the year. Though it has received general and

## All Drugs used have been carefully selected.

hearty support from all parts and all classes in the Central Division of Queensland, the sinews of war have been chiefly contributed by the people of Rockhampton and the surrounding districts.

The strike in shipping circles which commenced on the 18th of August and collapsed on the 30th October, naturally affected Rockhampton in common with other towns and portions of the colony. But owing to the narrow limits of the local shipping industry and the absence of sympathy from other classes, it was not so severely felt as would be the case in a large community.

The Hall Carnival, which was provided for the people of Rockhampton and district by the generosity of Mr. and Mrs. T. S. Hall, commenced on the 27th September with the Gymnasium and Cycling Sports at the Club's Grounds, North Rockhampton. On Monday, the 29th, the children of the State School were taken to Emu Park for a day's outing. On Tuesday, the 30th, a Regatta was held on the lighthouse reach of the Fitzroy, under the auspices of the local Rowing Clubs. The chief feature of the Regatta was an All-comers' Sculling Race, in which the celebrated oarsmen Kemp, Stanbury, and Neilson took part, the former being the winner. Wednesday, the 1st, and Thursday, the 2nd October, were devoted to racing, and two successful days' meetings were the result. On Friday, the 3rd, a Fire Brigade competition took place; also Football Matches between the Mount Morgan Rovers and Cawarral Harriers (Rugby), which was won by the former, and between Mount Morgan and Rockhampton (Association), in which the latter were successful. On Saturday, 4th, a Football Match was played under Rugby Rules, between combined Rockhampton and Mount Morgan, Mount Morgan proving the winners by one point to *nil*. On the same day a Pigeon Match came off at Emu Park. The Carnival was brought to a conclusion on Monday, 6th, by a supplementary regatta on the town reach of the river, when the events postponed from the previous Tuesday were completed, and in addition an All-comers' Handicap Race was competed for by the same oarsmen as on the first occasion, Kemp again defeating his opponents. The management of the Carnival was under the local direction of Messrs. P. E. Dalzell and R. T. Shields, with the assistance of committees appointed by the different clubs. As the result of the Carnival, a considerable sum of money was distributed among the local sporting societies and charitable institutions.

The year 1890 has not been such a good year from a commercial point as was anticipated, this may be partly attributed to the interruption placed in the way of business by the protracted wet season and by the Maritime Strike. It is to be hoped that the year 1891 will prove more satisfactory and more prosperous in view of the recent good seasons and growing prosperity of the Western Country.

## INDUSTRIES.

THE CENTRAL QUEENSLAND MEAT EXPORT COMPANY, LIMITED.—The works are situated at Lake's Creek, three miles from Rockhampton, on the Fitzroy River. For several years the operations have chiefly been confined to the canning of meats, soups, and meat extract for exportation; but during the past year, large quantities of beef and mutton have been shipped to England in a frozen state. The works are very extensive, and contain all the necessary machinery for the purpose. The refining of tallow is also an important item. The company employ about 300 hands, and as most of those engaged on the works live in the immediate vicinity, quite a small township has sprung up. As an industry, this may be considered the most important in the district, employing, as it does, so many hands, and offering such a large opening for the disposal of the surplus sheep and cattle of Central Queensland. The excellence of the tinned meats prepared by this company is generally admitted, and good prices have always been obtained in the home markets.

To Mr E. C. BLAKE, M.P.S., Pharmaceutical Chemist, Rockhampton.

Dear Sir,—I have often been on the point of writing to you to testify my appreciation of your "Preservine," but it is only since the summer has again made its appearance that the merits of it has again come to the front. It is a positive necessity in our house, and I have been thanked repeatedly for being the means of its introduction into others. It certainly does all you claim for it, and in my own case I have found it very useful for a variety of outside purposes. I write this for publication if you think proper, as I think its merits are not sufficiently generally known.

Yamba, November 15, 1890.

Yours faithfully,

F. OLIVERIA.

Anyone wishing to give the "Preservine" a trial will be forwarded a small sample packet gratis on application.

Sold in packets containing 1lb, 2s 6d each; 7lb, 16s; 14lb, 30s; 28lb, 56s.

A special quotation will be made to Butchers, Dairymen, &c., requiring a larger quantity. A Liberal Discount allowed to Storekeepers.

Clark's Fairy Lamps sold by E. CHAS. BLAKE.

## Blake's Cherry Tooth Paste, recommended to smokers

Gogango Divisional Board; J. O'Shanesy (Chairman), H. Beak, D. McDonald, J. Atherton, T. Smith, S. Ewart, W. H. Flowers, W. Broome, J. Hatton. The Gogango Division has an area of 6270 square miles, it is one of the most extensive in the colony. The annual value of rateable property for 1888 was £58,921.

Fitzroy Bridge Board: T. Kelly (President), S. W. Hartley, E. B. Moyle, Hugh Fiddes (representing the Rockhampton Council), W. G. Thompson, T. Nobbs, O. Lewis (representing the North Rockhampton Council), S. Ewart, H. Beak (representing the Gogango Divisional Board); Secretary, James Hall.

The Port Curtis and Leichhardt District Hospital is situated in a favourable position on the Athelstane Range. During the year ending 1889 860 indoor and 1626 outdoor patients received treatment. There are 5 wards containing 15 beds for females, and 11 wards containing 78 beds for males. The donations and subscriptions received amounted to £1612 16s 7d. President, T. Kelly; Vice-President, S. W. Hartley; Hon. Medical Officers, Dr. W. Callaghan, Dr. G. Thon, Dr. S. Stuart, Dr. D. S. Macdonald, Dr. V. Voss; Committee, B. Fahey, J. H. Holdsworth, H. Williams, E. B. Moyle, G. B. Shaw, W. G. Thompson, D. Martin, Walter Thompson, J. Stephenson, W. Broome, A. E. Hardaker; Hon. Treasurer, E. K. Ogg; Secretary, Alex. Reid; Resident Surgeon, Dr. H. C. Brannigan; Dispenser, E. Y. Warrington.

Rockhampton Benevolent Society: During the year ending June, 31st, 1890, the Society issued 6255 relief tickets, entailing an expenditure of £732 13s 4d. The expenses of the department are met by Government grants and public subscriptions. A large number of inmates were provided for in the Benevolent Asylum during the year, the monthly average being 21 adults and 7 children. The expenditure was £429 17s 4d, towards which £42 11s 10d was received from pay patients. The expenses are defrayed by Government grants and donations from friends and the public. In the Maternity Ward, which has been established four years, there were 37 births. The number of inmates provided for shows an average of eight per month. The expenditure was £169 7s 6d; £101 13s was received from pay-patients and entrance fees. The expenses of this ward are provided for by the Asylum funds, entrance fees, and pay-patients. The Committee, recognising the inadequacy of the old Children's Hospital, have erected a new building, which is much larger than the former hospital, and has been constructed to meet all the requirements of an institution of this kind. The ground has recently been fenced, and a morgue erected at a cost of £370 3s 5d. During the year 67 indoor and 139 outdoor patients received treatment; only two deaths occurred in the institution during this period. The expenditure for the year was £854 6s.

**SPEEDILY SUBDUES THE MOST OBSTINATE FEVER,**

And in smaller dozes it Acts as a Tonic, Braces up the System, and  
renders it Impervious to Malarial Influences.

## POSTAL INFORMATION.

The Delivery Office is open from 9 a.m. to 6 p.m. daily, Sunday excepted. Lock-boxes from 8 a.m. to 8 p.m.

The Dead Letter Office is open from 10 a.m. to 5 p.m., except on Saturday, when it is closed at noon.

The Office for Registration of Letters is open from 9 a.m. to 5 p.m.

The Office for the sale of Stamps is open from 9 a.m. to 6 p.m.

The Money Order Office is open from 10 a.m. till 3 p.m., except on Saturday, when it is open till 12 noon.

The Country Offices are open from 9 a.m. to 6 p.m., except when mails arrive at a later hour; in which case they are open for an hour after such arrival, but not later than 8 p.m.

---

## GENERAL RULES TO BE OBSERVED.

All Letters, Packets, and Newspapers posted in Queensland that are required to be prepaid, must bear Queensland Stamps.

Inland Letters inadvertently posted, either unstamped or insufficiently stamped, will be forwarded to their destination; but, before delivery, double the amount of deficient postage must be paid.

Insufficiently prepaid letters or packets or wholly unpaid letters posted for transmission to the United Kingdom, will be forwarded, but charged with the deficiency and a single rate as a fine.

Insufficiently prepaid newspapers addressed to the United Kingdom, if prepaid one rate of postage, will be forwarded by the direct Torres Straits route and charged double the deficiency.

Any insufficiently prepaid letters posted for transmission to the United States of America or Canada, will, if bearing at least a single rate of postage, be forwarded and charged with the postage deficient, and a single rate of postage as a fine; any letter not bearing a single rate of postage will be opened and returned to the sender.

Unpaid and insufficiently prepaid letters posted for transmission to British Colonies (excepting the Australian Colonies and New Zealand), and to Foreign Countries (unless in special cases), through the United Kingdom will be forwarded and charged with the postage and fine on delivery—the latter as if wholly unpaid.

Insufficiently prepaid or wholly unpaid letters and insufficiently prepaid packets posted for transmission to any of the Australian Colonies or New Zealand will be forwarded but charged with the deficiency, and a single rate of postage as a fine.

Insufficiently prepaid or wholly unpaid letters will be forwarded to British India, Egypt, and the Cape of Good Hope, double the deficiency being charged on delivery; on letters from those countries the deficiency and one rate as a fine will be charged.

Upon receipt of any *Letter or Packet supposed to contain articles liable to Customs duty* a postmaster should advise the addressee and the Customs Officer of the fact, and also intimate to the former that he must satisfy the latter as to the nature of the supposed dutiable articles, and pay any custom charges before delivery can be made to him.

Clement's Tonic, Price 4s. per Bottle.

If there is no invoice or means of satisfying the Customs Officer except by examination of the contents of the letter, &c., the addressee should authorise the postmaster in writing to deliver it to the Customs Officer for that purpose, and should this be objected to, the Letter or Packet must then be sent to the Dead Letter Office, under clause 35 of the Postage Act.

Wedding Cake cannot be forwarded unless it is secured in metal covering or in such a way that it cannot affect the contents of the mail bag or attract vermin.

*Letters or Packets Containing Gold or Silver, Money, Jewels, &c.*—No letter or packet, whether registered or unregistered, containing either gold or silver money, jewels, or precious articles, or any other article whatever, liable to Customs duties, is allowed to be conveyed by post to any of countries comprised within the Postal Union, except the United Kingdom. Any Letters or Packets containing such enclosures and addressed to the countries comprised in the *General Postal Union* with the above exception, will not be received at any Post Office.

*Letters, Packets, and Newspapers on being Re-directed*, are charged the same amount of postage, in addition to the original postage, as would be payable if such letter, packet, or newspaper were originally posted at the place of re-direction (excepting soldiers' or sailors' letters). This rule does not apply to letters re-directed from place to place within the eight mile radius of the General Post Office. Such letters are forwarded uncharged.

Unclaimed and irregularly posted letters, packets and newspapers posted in Queensland, and which are returned through the Dead Letter Office to the writers or senders thereof, are taxed with the usual town or country postage, as the case may be, in addition to any postage that may have been originally charged thereon, to be collected on delivery.

A Postmaster may refuse to receive or transmit by post any letter, packet or packet of newspapers exceeding sixteen ounces in weight, or of inconvenient form or dimensions, or containing, or reasonably suspected to contain, any article likely to injure the other contents of the mail bags or any person.

*Unclaimed Letters.*—Letters, packets, and newspapers, if not claimed, are kept at the Post Office to which they are directed for a period of one month. If not claimed at the expiration of that time they are sent to the Dead Letter Office, and the letters are then advertised in the *Government Gazette*.

Unclaimed Letters received at the Dead Letter Office are advertised in the first *Government Gazette* of each month, as well as in Dead Letter Lists, which are regularly supplied to every post and receiving office in the colony, and should be exposed outside those offices for the information of the public. Letters posted in the colony, if not claimed within one month after being advertised, will be opened and returned to the writers. Intercolonial letters will be kept three months, and British and Foreign letters six months, after which they will be returned to the colony or country whence they were received.

*Registered Letters.*—For the Registration of Letters (except where specially mentioned) a Stamp of the value of fourpence must be affixed in addition to the postage chargeable. Letters, Packets, and Newspapers can be registered at any Post Office during office hours on payment of the registration fee. Receipts for the same will be given, and every precaution will be adopted to ensure their safe delivery, by entering them on the Letter Bills and obtaining a receipt for them on delivery. As the Post Office, however, is not responsible for the loss of any letter, packet, or newspaper, whether registered or otherwise, persons sending Bank Notes or Drafts are advised to take the numbers and particulars,

**Clark's Pyramid Night Lights, boxes containing 8 lights, 1s 6d each**

## Principal Disinfectants kept in Stock.

and to cut such Notes or Drafts in halves, and to send them by different posts. The registration fee on letters and books and Savings Bank business, posted by Savings Bank officers in the Country districts and addressed to the Savings Bank Head Office, need not be paid in advance as it will be collected on delivery.

### NEWSPAPERS.

Every newspaper shall be sent without a cover, or in a cover open at both ends, and there shall not be in or upon any such newspaper or the cover thereof, any communication, character, or figure, letter, or number (other than the words "newspaper only," the printed titles of such newspapers, the printed names, occupations, and place of business of the printer, publisher, or vendor thereof, the name, occupation, and address of the person to whom it is sent), nor shall anything be enclosed in, or with, or accompany such newspaper or cover, otherwise such newspaper shall not be transmitted or delivered.

Newspapers are transmitted within the Colony free of charge, if posted within seven days from the date of publication; if posted after that period they are subject to a charge of One Penny. Newspapers from beyond the colony (*i.e.*, foreign newspapers) re-posted are subjected to the charge of One Penny each newspaper.

### BOOKS AND PACKETS.

*Preparation for Post.*—Packets and books may be sent through the post—without a cover, but not fastened against inspection with anything adhesive, such as gum, postage stamp, sealing wax, &c., or in a cover open at one end or side, or with the flap left unsealed or fastened with a binder or in such manner as will permit of opening for examination and re-closure. If the cover be slit, the opening must be sufficient to admit of the contents being easily withdrawn for examination. The cover may bear the sender's name and address, and the description of contents must be endorsed thereon. Packets and books may be tied with string or tape, but officers of the Department may cut the string or tape to examine the contents, but if they do so, must tie the packet up again. Samples of seeds, drugs, &c., which cannot be sent as open packets, may be enclosed in bags or boxes fastened so as to be easily undone and re-fastened.\*

*Books Rate.*—Inland and Intercolonial, for every 4oz. or fraction thereof 1d. The following and similar articles may be forwarded at Book rates: Printed books, pamphlets, magazines, and reviews, and wholly printed publications that do not come within the definition of newspapers; printed music, photographs, &c., bound and published in book form. All other articles not coming within the foregoing definition, or within that of newspapers, to be treated as packets. Parcels of books must not exceed 8lb. in weight, but a single book will be allowed not exceeding 7lb. No book to exceed two feet in length, or one foot in breadth or depth, or to be of inconvenient form.

*Packets*—Rate:—Inland and Intercolonial, for every 2oz. or under 1d.

\*Note.—If the above conditions are not complied with, the Packet will be regarded as insufficiently paid letters, and charged accordingly.

*Weight*—For places within Queensland: Packets, patterns, &c., not to exceed 16oz.; books not to exceed 8lb.

*Dimensions.*—No Packet to exceed two feet in length, or one foot in breadth or depth, or to be of inconvenient form.

**Clark's Fairy Lights, boxes containing 6 lights (large size) 2s each**

### POSTAL NOTE REGULATIONS.

*Classes and Value.*—Postal notes are of four classes, namely:—1. The shilling note printed with green ink, and bearing a half-penny fee stamp. (This note backed by a Telegraph form, which when filled up with a message of ten words, will be received at any Telegraph Office, and transmitted to any station within the colony as a paid telegram). 2. The half-crown note printed with red ink, and bearing a penny fee stamp. 3. The five-shilling note, printed with blue ink, and bearing a two-penny fee stamp. 4. The ten-shilling note, printed with lilac ink, and bearing a three-penny fee stamp.

*How Numbered and Signed.*—Every postal note so issued is numbered with a distinctive number, and signed by the issuing officer appointed by the Postmaster-General in that behalf.

*Payable to Bearer.*—Every postal note, except when crossed as provided in the next clause of these regulations, is payable to the bearer on demand.

*Crossed Notes.*—When additional security is desired for remittance purposes, the lawful owner of a postal note may write or stamp across its face, between two transverse lines, the name of any bank, firm or person to whom he desires payment to be made. A postal note so crossed to a bank or firm, will not be payable by the Postmaster-General (or transferable) until it has been endorsed or stamped by some person duly authorised by such bank or firm; or, when crossed to any person, until it has been endorsed by such person.

*Supply of Notes to Private Persons.*—The Issuing Officer will supply, post free, in quantities of not less than £5 worth at one time, postal notes to any person remitting cash in payment for the same, less a discount of two-pence in the pound.

*Receivable as Cash.*—Postal notes will be received at any post or telegraph office as cash, at their face value, less amount of fee stamp, in payment of money due to, or for services performed by the department.

*Notes may be given in Change.*—Any officer of the Post and Telegraph Departments may, for the purpose of giving change only, pay out, at its face value, exclusive of amount of fee stamp, a postal note which has been previously sold and the stamp thereon obliterated.

*Paying Offices.*—Every postal note will be payable to bearer, or to its lawful endorser, if crossed on presentation, within the usual banking hours, at any Postal Note Paying Office within the colony.

The Postmaster may refuse payment of a postal note—if, having been crossed it is not endorsed, and is presented by any person not authorised to endorse the same, or not being the person in whose favor it was crossed; if the paying officer has reason to believe the endorsement to be a forgery, or made by an unauthorised person; if the note is so soiled or mutilated that any signature thereon has become undecipherable.

---

### MONEY ORDERS.

Money Orders may be obtained and made payable at any Money Order Office in Queensland, on payment of the following charges:—For any sum not exceeding £2, 3d.; above £2, but not exceeding £5, 6d.; above £5, but not exceeding £7, 9d.; above £7, but not exceeding £10, 1s.

Blake's "Preservine" is a Registered Trade Mark.

---

The Australian Colonies, Tasmania, and New Zealand, for any sum not exceeding £5, 1s. ; above £5, but not exceeding £10, 2s.

The United Kingdom, British Post Offices in China, Japan, Cape of Good Hope, India, Ceylon, Canada, Straits Settlements, and the United States of America :—For any sum not exceeding £2, 1s. ; above £2, but not exceeding £5, 2s. 6d. ; above £5, but not exceeding £7, 3s. 6d. ; above £7, but not exceeding £10, 5s.

At the same rate (but subject to a deduction on payment of threepence for £2, sixpence for £5, ninepence for £7, and one shilling for £10), Money Orders can also be obtained on the following Foreign Countries and British Colonies :—Belgium, Denmark, Danish West Indies, Dutch East Indies, Egypt, German Empire, Heligoland, Holland, Italy, Norway, Portugal, Sweden and Switzerland, Bermuda, Falkland Islands, Gibraltar, Newfoundland, S. and W. Africa, West Indies, Cyprus, and North Borneo.

No single Money Order will be issued for a larger sum than Ten Pounds. Money Orders may be obtained between the hours of 10 a.m. and 3 p.m. except on Saturdays, when the Office closes at noon. List of Money Order Offices in the Colonies, the United Kingdom, and other countries, may be seen, and further information obtained at any Money Order Office in Queensland.

Money Orders may be transmitted by Telegraph between any Money Order Office (which is also a Telegraph Office) in Queensland, and between Queensland and any Money Order Office in New South Wales, Victoria, South Australia, and Tasmania, having telegraphic communication, on payment of the telegraph charge of ten words, for a message, in addition to the Money Order Commission. If required and within the Colony, the order will be advised by "urgent" telegram, double rate being charged.

## ELECTRIC TELEGRAPH.

Telegraph Offices are open to the public between the hours of 9 a.m. and 6 p.m. daily, Sundays and Holidays excepted; on Sundays, Good Friday, and Christmas Day, from 9 to 9.30 a.m., for urgent business, and on Government holidays from 9 to 10 a.m. and 5 to 6 p.m.

Prepaid telegrams only may be dropped into the box, provided at each Telegraph Station for the purpose, at any time when the office is closed, and will be transmitted when business is resumed. Such telegrams, with full fee, must be enclosed in sealed envelopes.

### REGULATIONS.

1. All messages will be held *strictly confidential*.
2. Messages tendered for transmission must be written with ink, in a legible manner, in plain language, on the proper form, and the address must contain all information necessary to avoid delay and ensure delivery. The signature of the sender will be required in authentication of each message, and as subscribing to the conditions imposed. To ensure greater accuracy, all amounts must be expressed in words as well as figures. Charge will be made for the words only.
3. Payment of all charges in advance will be required, except—(a.) For replies to interrogatory messages which contain the words "*Reply Paid*," (b.) For messages for transmission within the colony of Queensland, or to any of the Australian Colonies, marked "*Collect*," when the sender is known to the officer in charge of the despatching station, and guarantees, in writing, that in the event of the message not being paid for on delivery, it will be paid for on demand by the sender. In all such messages the word "*Collect*" must be written by the sender as the last word of the message to be despatched. (c.) Press messages to be paid for at receiving station on delivery.
4. The address, signature, name of sending station, and the date, hour, and minute of the deposit of the message will be transmitted without charge. When the sender wishes to pay for a reply, have the message repeated or posted, instructions are to be inserted in the address immediately before the name of the terminal station. Messages which are addressed beyond the limits of delivery, can be posted to their destination free of charge.
5. Ordinary rates will be charged for messages in any one of the following languages, namely, English, French, German, Italian, Dutch, Portuguese, Spanish, and Latin. Words must be used consecutively in their ordinary signification so as to be intelligible to persons familiar with those languages. Every message in secret language, or consisting of words in any admitted language (as above mentioned), having no connective meaning, or of groups of letters or figures, shall be regarded as a cypher message, and be subject to an additional charge of 50 per cent.; and in a message containing one or more words in cypher, every such word shall be counted as two words, and the extra charge be added to the minimum rate for the message, provided that such extra charge shall not exceed 50 per cent. on the ordinary rate which would be payable on account of the said telegram. Groups of five letters or five figures count as one cypher word.
6. Messages will be transmitted in the order of their reception, unless on the service of the State, or matters relating to the administration of justice, in which cases precedence may be given.
7. Messages will be delivered free within one mile of the station to which addressed. If beyond that distance, according to the instructions contained in the address. Expenses incurred for portage, cab hire, or boat hire, payable

**BLAKE'S**  
*Handy Medicine Chest*

AND

★*EMERGENCY CASE,*★

**PRICE £3 3s.**

---

Realising the difficulty that is frequently experienced in procuring medicine by those who live at a considerable distance from a doctor or chemist, and knowing the vital importance of immediate treatment in all cases of sickness or accident, the proprietors have fitted up the "Handy Medicine Chest and Emergency Case," which is replete with all the necessary medicines, full directions being given for their use.

Anyone having one of these Chests may, with confidence, rely upon being able to treat all minor ailments, to avert what might become a serious illness, and to give immediate attention to any accident, thus avoiding that delay by which much needless suffering is caused and many valuable lives are sacrificed.

The Chest is a handsome box, with lock and key; the medicines are in stoppered bottles, which can be refilled at any time as required.

The price (£3 3s.) is actually less than the cost of the medicine alone, if purchased singly.

by the receiver, will be charged. Messages which are addressed beyond the limits of delivery or which do not contain special directions as to transport, may be posted to their address by the terminal Telegraph Station free of charge.

9. In the event of any interruption to communication by which messages may be unusually delayed, it will be optional with the senders, on application *before transmission*, to withdraw their messages and receive back the amount paid.

11. If desired, messages of consequence can be repeated from stations at which received to stations from which originally sent, on payment of an additional half-rate; but no responsibility will be undertaken, nor any claim for compensation entertained for any errors or mistakes in transmission or delay in delivery of messages, whether repeated or unrepeatd, nor of non-transmission or non-delivery of messages from whatever cause such errors or mistakes in transmission or delay in transmission or delivery or non-transmission or non-delivery may arise.

Envelopes containing messages for transmission by telegraph, from any place in Queensland, posted at any Post Office not a Telegraph Office, with the words "Telegraph Message only" written thereon above the address, and directed to the nearest Telegraph Office, may be forwarded free of postage; and the officers in charge of the Telegraph Office, to which such envelope may be addressed, shall transmit the message contained therein to its destination, provided the full fee, either in cash or unobliterated postage stamps, be also enclosed.

## PASSENGERS.

### GENERAL INFORMATION.

Return Tickets are issued at the price of a single fare and a half.

Children under 3 years of age, "free," over 3 and under 12, half fares.

Passengers starting from any station at which tickets are issued must, before entering a Railway Carriage provide themselves with proper Tickets; if they are unable to produce proper Tickets on demand, they will be liable to pay the fare from the station whence the train started.

Return Tickets between all stations are available as follows:—40 miles and under, 1 week; 41 miles to 150 miles, 2 weeks; 151 miles and over, 4 weeks.

Tickets issued on Sundays will be at the same fares as are charged for similar Tickets on week days.

Season Tickets will be issued on application to Station Masters, for one, three, six, or twelve months, between all stations, at reduced rates, which can be learned on application at the Railway offices.

Scholars' season Tickets will be issued on half ordinary season ticket rates to pupils attending any Grammar or other Public School, upon application by the Master of the schools on a printed form to be obtained at railway stations.

Season Tickets (for periods of not less than six months) will be issued at two-thirds of adults' rates, to youths and females under 20 years of age who are earning under £65 per annum. Properly signed declaration form, countersigned by employer, is required to obtain this concession.

Tickets at single fares, and for children under 12 years of age at half single fares for the double journey, will be issued to pupils at schools during school vacations, on application to the station masters on a proper printed form which must bear the certificate of the principal of the school at which the scholar applying attends. Return tickets will also be issued during vacations to students attending public schools or colleges in Sydney and Melbourne—Under 16 years of age, half single fares; over 16 years of age, half return fares, on production of duly signed certificates.

For Sunday School excursions in parties of not less than 50 adults, ordinary fares; scholars, half fare, irrespective of age.

Tickets at single fare for double journey will also be issued to State School Teachers during school vacations on application to station masters on proper printed forms duly certified. Athletic club or teams, when travelling in parties of 12 or more, can obtain special tickets at a reduction of 25 per cent. off the ordinary fares.

Special Tickets at half current rates will be issued to the reporting staff of any newspaper published in the colony available to any one reporter whose name has been previously submitted and approved of by the Head Office. This ticket only to be used when the reporter is travelling on press business.

**RESERVED CARRIAGE.**—When compartments are reserved for any person or persons the fare will be as follows:—Saloon compartment, ten first-class fares; small compartment, four first-class fares.

**SPECIAL TRAINS.**—The charge for a Special Train will be:—For any distance 5s. per mile; minimum charge, £5. All passengers to take tickets in addition at ordinary rates. For the return journey the charge will be half the above rates and fares, provided the Return Special starts within 12 hours from time of arrival.

**EXCESS LUGGAGE IN CHARGE OF PASSENGERS.**—Not being Goods, Produce, or Merchandise—First-class passengers are allowed 112lbs., and Second-class 84lbs., free; but for every 28lbs. or part of 28lbs. additional, the following rates

**Clark's Fairy Lights, boxes containing 6 lights (large size) 2s each**

## Sole Agent for "Neurotic."

are charged:—10 miles and under, 9d.; 11 miles to 25, 1s.; 26 miles to 50, 1s. 6d.; 51 mile to 100 miles 2s.; 101 to 150, 2s. 3d.; 151 to 200, 2s. 6d.; 201 to 250, 2s. 9d.; 251 to 300, 3s.; 301 to 350, 3s. 3d.; 351 to 400, 3s. 6d.; 401 to 500, 4s.

**CLOAK ROOM CHARGES**—Each parcel 2d., for twenty-four hours; over that time a charge of 1d. per day on parcels will be made. All packages left on the railway premises will be taken to the cloak room, and the above charges made. Luggage for passengers proceeding by rail may be left at any railway station subject to the foregoing charges.

Special Cloak Room tickets of the value of 2d. each are provided for articles sent to railway stations for passengers proceeding by rail. These tickets are in duplicate parts, one to be affixed to the package, the other being retained by the owner and presented at the Cloak Room when delivery is applied for. Nothing heavier than 56lbs. will be received under this regulation unless it is *bona fide* passengers' luggage. On any article not removed from the Cloak Room within 24 hours, an additional charge of 1d. per day will be made.

## PARCELS, GOODS, AND LIVE STOCK RATES.

### PARCEL RATES.

Miles.	3lbs. and under	3 to 7 lbs.	7 to 14 lbs.	14 to 28 lbs.	Parcels over 28lbs. in weight to be charged for each extra lb. as under
	s. d.	s. d.	s. d.	s. d.	s. d.
50 miles and under .. ..	0 3	0 6	0 9	1 0	0 0 $\frac{1}{2}$
51 to 100 miles .. ..	0 6	0 9	1 3	1 6	0 0 $\frac{1}{2}$
101 to 200 miles .. ..	1 0	1 3	1 9	2 6	0 1 $\frac{1}{2}$
201 to 300 miles .. ..	1 6	1 9	2 3	3 6	0 1 $\frac{1}{2}$
301 to 400 miles .. ..	1 9	2 3	2 9	4 6	0 1 $\frac{1}{2}$
401 to 500 miles .. ..	2 0	2 9	3 3	5 6	0 2

All parcels to be at stations thirty minutes (five minutes in the case of stamped parcels) before the advertised time of departure of the train by which the senders wish them forwarded.

Opium, hats, bonnet boxes, and cases of millinery double rates.

Parcels over £10 value and under £50, double rate, £50 and over, quadruple rate. Although these rates are charged, and the value of such parcels declared accordingly, the Commissioners for Railways will not hold themselves responsible for contents.

Newspaper parcels and despatches, half rates; minimum charge, 6d.

Packed parcels (that is several parcels enclosed in one) quadruple rates.

All parcels over 56lbs. will be charged at Goods Rates.

**Clark's Food Warmers, 4s 6d, 5s 6d, 6s 6d each**

## Blake's Egyptian Eye Lotion, 2s. 6d., for Blight, &c.

All parcels arriving at stations should be taken delivery of within twenty-four hours after arrival. If left over that time they will be subject to cloak room charges.

No claim for loss or damage, for which the department is accountable, will be allowed, unless made on the day of the arrival of the goods. All goods are carried at owners' risk; but at Commissioners' risk, on payment of an additional charge of 25 per cent. on the ordinary rates.

### HORSE, CARRIAGE, AND DOG RATES.

The Commissioners will not be responsible for any loss or damage whatsoever, that may be sustained by these while upon railway premises or vehicles.

**RACEHORSES.**—Ordinary rates are charged for racehorses to places where race meetings are held, and if unsold and returned within a week, will be carried free on the return journey. Certificates signed by the Secretary of the Race Club must be handed to the station master at the time the horses are forwarded and returned.

**HORSES IN BOXES.**—4d. per mile for first 100 miles; 101 to 200 miles, 3d. per mile added to the 100 mile amount; 201 to 300 miles, 2d. per mile added to the 200 mile amount; over 300 miles, 1d. per mile added to the 300 miles amount. Entire horses 6d. per mile for first 100 miles; 101 to 200 miles, 5d. per mile added to the 100 mile amount; 201 to 300 miles, 4d. per mile added to the 200 mile amount; minimum charge, 5s.

**Dogs.**—Under 10 miles, 6d.; 11 miles to 25, 1s.; 26 miles to 40, 1s. 6d.; 41 miles to 80, 2s.; 81 miles to 120, 2s. 6d.; 121 miles to 160, 3s.; 161 miles to 200, 3s. 6d.; 201 miles to 240, 4s.; 241 miles to 280, 4s. 6d.; 281 miles to 320, 5s.; 321 miles to 360, 5s. 6d.; 361 miles to 400, 6s.; 401 miles to 440, 6s. 6d.; 441 miles to 480, 7s.; 481 miles to 501, 7s. 6d. Charges to be prepaid.

**CARRIAGES.**—5d. per mile for first 100 miles; 101 to 200 miles, 4d. per mile added to the 100 mile amount; 201 to 300 miles, 3d. per mile added to the 200 mile amount; over 300 miles, 2d. per mile added to the 300 mile amount. Minimum charge 10s.

### LIVE STOCK RATES.

All live stock to be loaded and unloaded by owners, and carried at owner's risk.

**CATTLE AND CALVES.**—The minimum charge for 10 miles and under, is as follows:—Half 4 wheel waggon, (2 head and under), 4s.; 4 wheel waggon (over 2 head), 5s. 6d.; 6 wheel waggon, 8s. 6d.; 8 wheel waggon, 25 per cent. on rate for 6 wheel waggon; beyond this distance, a specific rate for each mile carried.

**SHEEP.**—Senders to load as many as the vehicles will carry without overcrowding. The minimum charge for 10 miles and under is—Half 4 wheel van, 5s.; 4 wheel van, 6s.; 6 wheel van, 10s. 6d.; 50 miles: half 4 wheel van, 13s. 6d.; 4 wheel van, 20s.; 6 wheel van, 44s. 6d.; 100 miles: half 4 wheel van, 25s. 6d.; 4 wheel van, 38s.; 6 wheel van, 84s.; longer distances at proportionate rates.

A return second class free pass will be issued to the drover or drovers, on the basis of one pass to 50 cattle or 500 sheep, on condition that the drovers accompany the live stock and attend to the same during carriage. Such pass shall include a dog for each drover.

**Pigs.**—The minimum charge for 10 miles or under is as follows:—Half 4 wheel van, 5s.; 4 wheel van, 6s.; 6 wheel van, 10s. 6d.; beyond this distance, a specified rate for each mile carried. Single pigs in crates charged under the Goods Classification.

None but Genuine Patents kept in Stock.

#### GOODS RATES.

The *Government Gazette* of December 19, 1890, contains a revised list of Goods Rates, and classification of same. The following is a brief summary:—

**MINERAL CLASS.**—10 miles and under, 1s. 3d.; 11 to 100 miles, 8s. 9d.; 101 to 200 miles, 15s.; 201 to 300 miles, 19s. 2d.; 301 to 500 miles, 27s. 6d. The goods comprise, Engine Ashes, Bricks, Clay, Coal, Drain Pipes and Tiles, Earth, Fire Bricks, Fire Clay, Flagging (stone), Gold Quartz, Gravel and Road Metal, Ironstone, Limestone, Ores (crude), Pyrites, Sand, Shale, Stone (rough dressed), Tailings (quartz), and Turf.

**SPECIAL AND AGRICULTURAL CLASSES.**—Class A.—10 miles and under, 2s. 6d.; 11 to 100 miles, 13s. 9d.; 101 to 200 miles, 22s. 1d.; 201 to 300 miles, 28s. 4d.; 301 to 500 miles, 40s. 10d. The goods comprise, all kinds of Agricultural Produce and Grain (except those in class B), Guano, Gypsum, Horns and Hoofs (in bags), Pig Iron, Lime (5 ton loads), Manures, Melons, Millet (as hay), Pumpkins, Sugar Cane, Superphosphates, and Water Tanks.

**Class B.**—10 miles and under, 3s.; 11 to 100 miles, 18s.; 101 to 200 miles, 30s. 6d.; 201 to 300 miles, 38s. 10d.; 301 to 500 miles, 55s. 6d. The goods comprise Arrowroot (unmanufactured), Bark (tanning), Blocks (wood paving), Boards (timber), Bottles (loose and empty), Bran and Pollard, Building Stone (dressed), Cabbages, Cauliflowers, Carrots, Chairs (railway), Contractors' Plant (railway), Cotton (raw), Felloes, Spokes, and Naves (undressed), Fencing Posts and Rails (wood), Fruit Cases, Glass (broken for smelting), Granite (rough), Hearthstones, Ice, Scrap Iron, Laths, Logs and Piles, Marble (rough) Mining Props, Onions, Ore (stream tin), Parsnips, Peas (green), Pineapples, Pipes (glazed), Rice (sweepings for pig food), Sawdust, Scrap Steel, Shingles, Tan-bark. **TIMBER.**—Logs piles and girders, split or sawn of all descriptions, pailings, posts, rails, spokes, boards (flooring and other), planed or dressed timber. Tin (stream), Turnips, and Vegetables not otherwise specified.

**MERCHANDISE CLASSES.**—These are in three classes and are fully specified in the *Gazette* above mentioned.

#### WOOL.

Wool consigned to Rockhampton will be delivered from the Rockhampton Station to any wharf or store in Rockhampton.

An allowance of 20 per cent. is made for greasy wool (only when so declared on consignment notes); if properly dumped and hooped with iron 25 per cent. will be allowed.

An allowance of 10 per cent. will be made on the rates for clean wool properly dumped and hooped with iron.

Rates for clean wool in bales.—100 miles, £2 10s. per ton; 150 miles, £3 10s. 10d.; 200 miles, £4 7s. 6d.; 300 miles, £5 12s. 6d.; 400 miles, £6 9s. 2d.; 450 miles, £6 17s. 6d.

Rates for clean Wool per ton between the following places and Rockhampton:—Westwood 15s.; Fernlees, 82s. 10d.; Springsure, 88s. 9d.; Capella, 86s. 6d.; Retro, 89s.; Retro Creek, 90s. 6d.; Langton, 92s. 6d.; Clermont, 94s. 3d.; Alpha, 105s. 3d.; Jericho, 113s. 4d.; Alice, 116s. 10d.; Barcaldine, 122s. 2d.; Saltern, 124s. 2d.

#### LOADING, AND UNLOADING, GATES AND SIDINGS.

Goods will not be received for delivery at stopping places, except by special agreement, senders taking all risk of loss or damage, and pre-paying carriage, and signing a special risk note accordingly.

The rates to or from Gates or Sidings do not include loading or unloading at such places.

The department does not undertake to preform this service other than at the regular stations, except by special arrangement.

**The Burglar's Horror" is Clark's Night Light Lamps, 1s 6d each**

Blake's Handy Medicine Chest, Price £3 3s. complete

Accuracy and purity a first consideration.

## ARRIVAL AND DEPARTURE OF STEAMERS.

### THE HOWARD SMITH LINE OF STEAMSHIPS.

Steamers leave Adelaide for Melbourne and Sydney, every Friday; Melbourne for Sydney, every Tuesday and Saturday; Melbourne to Adelaide, every Tuesday.

A Fortnightly Service between Melbourne and Burketown is now established, the steamers Gabo, Leura, or Buninyong leaving the former port every alternate Tuesday, calling at all ports *en route*, except Maryborough and Bowen.

Steamers are despatched from other ports as follows:—

Sydney to Adelaide, every Saturday.

„ „ Melbourne, every Tuesday and Saturday.

„ „ Brisbane, Maryborough, and Rockhampton, every Tuesday.

„ „ Burketown *via* ports, every alternate Saturday.

Brisbane to Rockhampton (direct), every alternate Tuesday.

„ „ Maryborough and Rockhampton, every Friday.

„ „ Burketown *via* ports, every alternate Tuesday.

„ „ Sydney, every Friday.

„ „ Melbourne and Sydney, every alternate Tuesday.

Maryborough to Southern Ports, every Wednesday; to Northern Ports, every Saturday.

Rockhampton to Southern Ports, every Tuesday (the steamers Burwah or Rodondo, leaving Sydney and Rockhampton every Tuesday, land and embark passengers and cargo at the Town Wharves, Rockhampton, without transshipment) and every alternate Friday; to Northern Ports, alternate Wednesdays.

Mackay to Northern Ports, alternate Thursdays; Southern Ports, alternate Fridays.

Townsville—North, alternate Saturdays; South, alternate Thursdays.

Cairns—North, alternate Sundays; South, alternate Tuesdays.

Port Douglas—North and South, alternate Mondays.

Cooktown—North, alternate Tuesdays; South, alternate Mondays.

Thursday Island—North, alternate Fridays; South, alternate Saturdays.

Normanton—North, alternate Wednesdays; South, alternate Thursdays.

Burketown to Southern Ports, every alternate Wednesday.

For further particulars, apply to the Company's Agents at the different ports.

### A.U.S.N. COMPANY, LIMITED.

Steamers despatched from Rockhampton as follows:—

For Gladstone and Bundaberg, every Thursday.

„ Maryborough, every Thursday, *via* Bundaberg.

„ Brisbane (*via* ports), every Thursday.

„ Brisbane (direct), every Tuesday, at 9 p.m., and alternate Friday night.

„ Sydney, every Tuesday, at 9 p.m., Thursday, and alternate Friday night.

„ Melbourne, Adelaide, &c., every Tuesday, at 9 p.m., and alternate Friday night.

„ Mackay, every Sunday, at 2 p.m., and alternate Wednesday evening.

„ Bowen, every Sunday, at 2 p.m.

„ Townsville, every Sunday, at 2 p.m., and alternate Wednesday evening.

„ Dungeness, Cardwell, Mourilyan Harbour, and Geraldton, every Sunday, at 2 p.m.

„ Cairns, Port Douglas, and Cooktown, every Sunday, at 2 p.m., and alternate Wednesday evening.

**Clark's Fairy Lights, boxes containing 6 lights (large size) 2s ea ch**

Clement's Tonic is a certain cure for Neuralgia, &c.

For Thursday Island, Normanton, and Burketown, every alternate Wednesday evening.

„ Noumea (New Caledonia), Suva, and Levuka (Fiji), from Sydney every Fortnight.

„ New Hebrides, from Sydney, Monthly.

Through Tickets issued to all the principal ports in Tasmania, Western Australia, and New Zealand.

Principal services from the South :—

Melbourne to Sydney and all Queensland Ports, every Saturday and Tuesday (transhipping at Sydney every alternate week.)

Sydney to Brisbane, Rockhampton, and Northern Queensland Ports, every Wednesday, Friday, and alternate Saturday.

Bundaberg and Gladstone to Rockhampton, every Wednesday.

For further particulars, apply to the Company's Agents at the different ports.

#### QUEENSLAND ROYAL MAIL LINE—LONDON TO QUEENSLAND.

Steamers leave London every four weeks for Brisbane *via* Torres Straits and all principal Queensland Ports; leaving Brisbane at the same interval on the return journey, *via* the same route.

The following are the Steamers regularly employed in this trade :—Jelunga, 5200 tons; Jumna, 5197 tons; Taroba, 4938 tons; Tara, 4712 tons; Dorunda, 3136 tons; Merkara, 3094 tons.

Fares to London :—saloon, £50; Return, £80, available for 12 months. Steerage (carried when inducement offers) £18.

### TIMBER. TIMBER. TIMBER.

TO THE PUBLIC OF ROCKHAMPTON & SURROUNDING DISTRICTS

## Samuel Johnston,

WHOLESALE AND RETAIL

### ✧TIMBER MERCHANT,✧

EAST STREET, ROCKHAMPTON.

In returning thanks for the liberal support afforded him in the past notifies that he has made extensive alterations in his Timber Yards, and now keeps a large and well-assorted stock of Rough and Dressed Pine and Hardwood; also Cedar, Beech, Felloes, Spokes, Doors, Sashes, Galvanised Iron, Nails, and Builders' Ironmongery, and customers can depend on getting their orders promptly supplied at lowest rates. Vessels are kept constantly running from the Saw Mills at Bundaberg to this port, so that Special Orders can be supplied on the shortest notice. Price Lists on application. Contractors and persons intending to build would do well to call and obtain our terms.

*E. B. MOYLE, Manager.*

## WHAT TO DO IN SICKNESS OR INJURY.

**APOPLEXY**.—Loosen the clothing round the neck and bathe the head with cold water. Apply mustard poultices to the calves of the legs.

**BLEEDING FROM THE NOSE**.—Apply cold water to the face and back of the neck; if this does not stop the bleeding, dissolve a little alum in a wineglass of water, and inject into the nostrils with a syringe, or immerse a cloth in the solution and plug the nostrils.

**BOILS**.—Poultice with linseed meal, and when matter has formed open with a knife and dress with Blake's Antiseptic Healing Ointment.

**BONES BROKEN**.—Lose no time in proper treatment. If one of the limbs is injured and is deformed, owing to the fracture, sufficient force must be used to bring the broken ends in place, and when the limb has assumed its former shape it must be kept in position by means of bandages and splints (the latter may be made out of any convenient strips of wood or stiff material, and must be sufficiently padded to prevent unnecessary pain to the patient). The bandages should be applied evenly and not too tightly. If the ribs are broken a broad bandage should be bound tightly round the body several times. If the patient has to be removed some distance before he can receive proper attention, means should be taken to prevent unnecessary movement of the injured parts.

**BURNS AND SCALDS**. Carefully remove the clothes and slightly puncture the blisters; do not break or tear the skin; dress the injury with Blake's Application for Burns and Scalds, or with Zinc Ointment spread on linen; if neither of these are procurable cover with ordinary wheat flour.

**CHOKING**.—Remove the obstruction if within reach of the finger or some hooked instrument, if not administer a strong emetic.

**COLDS**.—Bathe the feet in hot water and drink some warm gruel before going to bed.

**CONVULSIONS**.—Put the patient in a hot bath, keep the head cool with cold water.

**COUGH**—Take Blake's Cough Balsam.

**CROUP**.—Keep the child in a hot bath (to which some mustard has been added) for fifteen or twenty minutes, give teaspoonful doses of Ipecacuanha Wine or some other emetic every few minutes, or tickle the throat, until vomiting is induced. Keep the patient warm and let the air in the room be kept at a moist heat by boiling water in an ordinary kettle or some convenient manner. Apply hot flannels or Linseed poultices to the throat. Wrap in flannel and avoid exposure to cold.

**CUTS**.—Stop the bleeding, remove any foreign substance from the wound, and bring the edges together by means of strips of plaster or a bandage. If the blood spurts from the wound in jets and is of a bright scarlet an artery injured, check the bleeding at once by tying a ligature between the wound and the heart; if the blood is dark and flows steadily a vein is cut and the ligature must be tied on the side of the wound furthest from the heart. Cobwebs, alum, tannin, tincture of iron (Steel Drops), are all valuable styptics and assist in stopping the bleeding. The cut may afterwards be dressed with Blake's Antiseptic Healing Ointment.

Blake's "Preservine" saves money, prevents waste.

DEAFNESS may frequently be removed by syringing the ear gently with warm water every day until the accumulated wax is removed.

DIARRHOEA AND DYSENTERY should be checked when the first symptoms appear by taking Blake's Diarrhoea and Dysentery Mixture. Careful attention should be paid to diet, which must consist chiefly of milk, well-cooked rice, &c. Meat, tea, beer, and spirits should be avoided until the attack has passed away.

DISLOCATIONS should be treated as soon as possible. To restore the joint that is "put out" to its proper position considerable traction or pressure is sometimes required. When the dislocation is reduced the injured limb should be allowed complete rest for a considerable time.

DROWNING.—Proceed to restore breathing without delay. Instantly loosen neck and waistbands, turn the patient on his face and raise the body so that any water may run out of the mouth. Turn the patient on his back and raise the head by placing a cushion under the shoulders; cleanse the mouth and nostrils, draw the tongue forward and secure it. Grasp the arms just above the elbows and draw them steadily upwards until they meet above the head; wait two seconds, then turn them down and press them gently and firmly for two seconds against the sides of the chest, repeat these measures, and at the same time rub the chest and face briskly and dash hot and cold water alternately upon the patient, until natural breathing is restored, then wrap in hot blankets and use all means to keep up warmth. The above measures for restoring animation should be continued for at least two hours if not successful earlier.

EAR-ACHE may be relieved by bathing the ear with hot water in which Poppy Heads have been steeped. If the pain continues, Blake's Neural Essence should be applied behind the ear.

EPILEPSY.—Prevent the person from doing himself injury, hold a piece of wood or the handle of a spoon between the teeth. The fits may be lessened, and sometimes entirely prevented, by taking Bromide of Potash.

EYES.—Blight and other inflammation of the eyes may be cured by using Blake's Egyptian Eye Lotion. Foreign substances in the eyes may be removed by means of a camel-hair brush dipped in oil, or the corner of a soft handkerchief previously moistened. Lime must be immediately washed out of the eye with weak vinegar water. The eye should not be rubbed; a drop of Castor Oil placed under the lids will give relief after the substance is removed, and the eye should be rested until all inflammation has subsided.

FEVER.—In all cases of Slow Fever, Fever and Ague, Intermittent and other similar fevers, Blake's Certain Cure should be taken without delay. It may also be taken as a preventive when fever is prevalent.

HICCUGH.—Hold the nostrils together with finger and thumb, and drink slowly a large draught of cold water.

HOOPING COUGH.—Keep the patient on light nourishing diet and avoid exposure to cold and damp. Blake's Cough Balsam should be given to alleviate the cough, and Blake's Electric Liniment may be rubbed on the chest and spine.

LIPS.—Cracked and sore lips may be cured by anointing with Lip Salve or Cold Cream.

MOSQUITO BITES.—Bathe with a weak solution of Ammonia or Baking Soda. If the hands and face be anointed with Oil of Lavender the inconvenience caused by the bites will be avoided.

NAIL INGROWING.—Cut the nail so that it is slightly shorter in the centre than at the sides; scrape the middle of the nail until it is quite thin, to relieve the pressure on the painful part.

---

Family recipes prepared from the best drugs.

---

**SNAKE BITES.**—Stop the circulation *immediately* by tying a ligature of rope or some convenient material round the limb between the bite and the heart. With a sharp knife cut out the flesh surrounding the wound, which should be sucked for half-an-hour by someone free from sore lips or mouth; keep up the bleeding by bathing with warm water; cauterise the wound thoroughly with a white hot wire or some Lunar Caustic. Give ten or fifteen drops (a proportionate amount to children) of strong Liquid Ammonia every half hour in a wineglass of water; if Ammonia is not procurable give spirits. Keep the patient awake and administer stimulants and hot coffee until recovered.

**SPRAINS.**—Keep the joint at rest and apply Blake's Concentrated Lotion or cold water bandages.

**SUNSTROKE.**—If the skin is cool and pulse feeble with easy breathing, every effort should be made to stimulate the patient; loosen the clothing, allow plenty of fresh air, and administer a tablespoonful of brandy or whiskey every ten or fifteen minutes. If the pulse is strong and the breathing unnaturally loud, lose no time in reducing the temperature. If ice can be obtained wrap lumps in cloths and apply to head and body, in the absence of ice the body should be immersed in cold water, which should also be poured on the head. Mustard plasters may be applied to the calves of the legs.

If the illness or injury be not serious enough to cause anxiety, the above treatment should be carried out, but in any case where there is the least appearance of danger medical assistance should be obtained without delay. The patient may be treated as directed until the arrival of the doctor.

TABLE OF DOSES.

One teaspoonful contains one dracham or 60 drops.

One tablespoonful contains half-an-ounce, or four teaspoonfuls.

A wineglass contains about 2ozs, or four tablespoonfuls.

In giving medicines to children the dose may be regulated as in the following table:—

Child	1 year	1-12th the dose for an adult.
" between 2 and 3 years	1-8th	" " "
" " 3 and 4 years	1-6th	" " "
" " 4 and 5 years	1-5th	" " "
" " 5 and 8 years	1-4th	" " "
" " 8 and 12 years	1-2	" " "
" " 12 and 21 years	from $\frac{1}{2}$ to a full dose.	" " "

The doses of medicines that are exceptionally strong should be smaller when administered to children, then in the above scale.

Elderly persons require a less dose than an adult.

Blake's Painless Corn Destroyer, price 1s., never fails.

## NOTES ON SICK NURSING.

**T**HE sick-room should be properly ventilated. In winter, if the window be opened, the patient may be protected from cold by being well supplied with blankets, and, if necessary, with hot water bottles to the feet.

Every care must be taken that the patient is not exposed to a draught.

The room chosen as a sick-room should be in such a situation as to be amply supplied with light throughout the day. If the light is too bright and irritating to the patient, this may be remedied by covering the windows with a plain, green blind. In some diseases of the eye it may be necessary to exclude all light from the room.

The bed should be placed so that the patient can see out of the window without effort; and, if possible, the window should be selected from which a pleasing view may be obtained.

An equable temperature must be maintained in the sick-room. This may be done by means of a thermometer, which, to be reliable, must not be hung in a draught, or exposed to the direct rays of the sun, or a fire, or lamp burning in the room.

If the room be too hot, it may be cooled by suspending a cloth previously moistened with water. A room which has an iron roof, and unceiled, is unsuitable for a sick-room, owing to the extreme variation in temperature.

All unnecessary articles of furniture should be removed, an extra bed or couch being retained, so that the position of the patient may be changed. The bedstead should be of iron, and the mattress of hair, or some material which can be afterwards exposed to the air. Light blankets should be used as a covering for the sick, heavy impervious bed-clothing being entirely dispensed with. A small table which can be placed by the bedside should be provided.

Soiled linen and chamber utensils which have been used, must be removed from the room at once.

The food must be of the best, and must be cooked so as to be readily digestible. It should be given to the patient at regular intervals, and not in sufficiently large quantities, at one time, to cause disgust. During meal-times the patient should not be interrupted by conversation or unnecessary noises. The wishes of the patient respecting the kind of food and time of taking may be considered, provided they are not in opposition to the doctor's orders, or likely to prove injurious. The food should be presented to the patient in the most enticing manner possible, and when placed unexpectedly before him, is often more acceptable than if the meal has been previously discussed.

The room, the furniture, the bed-clothing, and the body-linen must be kept scrupulously clean. Much comfort may be afforded the patient by washing the body and changing the linen, which should be previously aired before a fire every precaution being taken that the patient does not catch cold. The following will be found to be the best way of changing the bed-clothing:—Roll up the clothes to be changed to the middle, lengthwise; put on the clean things, previously half rolled, so that the two rolls are side by side; lift the patient on to the newly-made part, slip off the clothes he has just been lifted from, and unroll the clean ones.

Care should be taken to give any medicine ordered in the exact doses, and at the time specified. All bottles should be placed out of the patient's reach, and those containing powerful medicines, or external applications, should be kept in a place away from the others. Before each dose is given the label should be carefully examined; by taking this precaution many mistakes would be prevented.

A complete stock of homœopathic medicines.

Noises likely to disturb the patient should be avoided. The slamming of a door, the flapping of a window-blind, conversation outside the room, or whispering in the room may cause restlessness, and resulting exhaustion. Friends should be advised to be judicious in their conversation in the sick-room, omitting all matters that may annoy the patient. Often well-meant suggestions of friends that some other treatment should be followed will make the patient uneasy and distrustful of those who have undertaken the treatment of the case.

When a doctor is in attendance careful observations should be made, and, if necessary, written down at the time, so that when he makes his visit he may be supplied with correct answers to any question that he may ask respecting the patient's condition during his absence.

Even when the patient is recovering the greatest care must still be exercised. Frequently a serious relapse occurs when the patient is considered out of danger. When the patient has sufficiently recovered a change of air to the seaside or some other healthy locality will prove beneficial.

While nursing the sick the patience of the nurse will often be severely tried; but as the well-being and comfort of the patient is a first consideration, all his whims and fancies must be humored so long as they are not likely to retard recovery.

Those who are inexperienced in cooking for the sick may find the following suggestions useful:—

EGGS.—Only new laid eggs must be used. They should be lightly boiled.

MILK should be given fresh, and before the cream has risen. It is more easily digested if a little sugar be added.

FISH is better when boiled than fried or cooked in any other way.

VEGETABLES should be boiled until they are quite soft.

FRUIT should never be given in typhoid fever, even when the patient is apparently recovering. In other cases it is advisable not to give it without the doctor's permission.

BARLEY WATER is an agreeable drink. It is prepared by washing 2oz. of pearl barley in cold water and rejecting the washing; then boiling it for 20 minutes in a pint and a half of rain water, and straining.

TEA must be used in moderation. It should be freshly made, and be given with sugar and milk. If an equal quantity of cold water be added, it is better for the patient.

TOAST WATER.—Cut a slice of bread, toast it thoroughly (without charring), and put it into a jug; boil a quart of water; allow it to stand till cool, and then pour it over the bread. A little lemon or orange-peel may be added. After it has stood for two hours, pour the liquor into another jug. This drink is very agreeable to a feverish patient.

LINSEED TEA is a useful demulcent drink. Take an ounce of linseed whole, and quarter of an ounce of liquorice root (bruised), put them into a jug, with a pint of boiling water, stand the jug near the fire for three or four hours, and strain through calico.

EGG BRANDY.—Take the yolk of an egg and beat it up with four tablespoonfuls of water and four tablespoonfuls of brandy, add a little sugar and nutmeg, or cinnamon, to flavor. Two tablespoonfuls of this may be given as a stimulant in cases of prostration, or last stages of fever.

MILK AND SODA-WATER.—Equal parts of fresh milk and soda-water form an excellent drink for correcting acidity of the stomach.

SAGO POSSET.—Put two tablespoonfuls of sago into a pint of water; stir till it thickens; take two tablespoonfuls of sugar with the rind of a lemon, and put it with half a teaspoonful of tincture of ginger into a teacupful of sherry wine; add this to the sago, and boil for five minutes. A wineglassful may be given at a time.

Blake's Certain Cure, price 5s., for fever, &c.

**ARROWROOT.**—Mix a teaspoonful of arrowroot with a little cold water, and then pour over it gradually a pint of boiling water until it is of a suitable consistence; boil for five minutes, and sweeten; flavour with lemon juice.

**SAGO.**—Macerate a tablespoonful of sago in a pint of water or milk near a fire for two hours, then boil for fifteen minutes, stirring constantly; add a little sugar and lemon juice.

**TAPIOCA** may be prepared in the same way as sago, but only requires half the time for maceration and boiling.

**GROUND RICE MILK.**—Mix a tablespoonful of ground rice thoroughly with a pint and a half of milk; add half an ounce of candied lemon-peel cut into slices, and boil for half an hour; strain while hot.

**BEEF TEA.**—Take a pound of beef, without fat, and mince fine; put it in an earthenware jar with a pint and a half of cold water; stand the pot on the hob, and let it simmer for three or four hours.

These and similar preparations may be given during the first stages of the illness. As the patient progresses towards recovery, more substantial articles of diet may be given. Care should be taken not to give anything likely to overtax the stomach. The following have been found useful in the early stages of convalescence:—

**ARROWROOT PUDDING.**—Put a tablespoonful of arrowroot in a basin with a little cold water, then add a pint of boiled milk, stirring constantly; beat together an egg and three teaspoonfuls of fine sugar; boil in a basin, or bake.

**ARROWROOT BLANC-MANGE.**—Take three tablespoonfuls of arrowroot, and make into a mucilage with water, then add milk in sufficient quantity, and boil till it is of a proper consistence; pour into a mould, and stand aside till cool. It may be eaten with fruit jelly, or with lemon juice and sugar.

**OATMEAL PORRIDGE.**—Into water that is kept boiling sprinkle from time to time a small quantity of oatmeal, stirring constantly while so doing, until a moderately consistent mixture is formed. Continue to boil, after adding the meal, for half an hour. This taken with milk forms a very good article of diet during early convalescence.

**RICE AND APPLES.**—Take a sufficient quantity of rice and boil it rapidly in hot water, then strain through a cullender, expose for a quarter of an hour, before the fire, and having stewed separately the requisite number of apples, mix them together with a moderate quantity of sugar. This forms a nice dish for those recovering from acute disease.

**BOILED BREAD PUDDING.**—Take of stale bread half a pound, pour over it a pint of hot milk, and allow the mixture to soak for an hour in a covered basin, then beat up with the contents of two eggs; put now the whole into a covered basin, tie a cloth over it, and place it in boiling water for half an hour. It may be eaten with salt or sugar.

**RICE PUDDING.**—Add two tablespoonfuls of rice to a pint and a half of milk, and let it simmer until the rice is soft; take two eggs, whites and yolks, beat them up with half an ounce of sugar, and add to it. Allow it to bake for three-quarters of an hour in an oven.

**BATTER PUDDING.**—Beat up two eggs with two tablespoonfuls of sugar and mix this with a tablespoonful of wheaten flour and a pint of milk; put into a basin of boiling water, and boil with a cloth tied over it.

**TAPIOCA PUDDING.**—Take some tapioca and heat with a pint of milk until it thickens; add to it the yolks of two eggs beaten up with two tablespoonfuls of sugar. Bake in a slow oven.

Sago and arrowroot may be made into puddings in the same way.

# **BLAKE'S** *Perfection Tooth Powder,*

FOR  
CLEANSING, PRESERVING, AND BEAUTIFYING THE  
TEETH AND GUMS.

*Gives a delightful fragrance to the breath. Should be used by all who are anxious to preserve their teeth from the disfigurement and discomfort caused by decay.*

REPORT FROM K. T. STAIGER, ESQ., LATE GOVERNMENT ANALYST.

Brisbane,  
14th July, 1888.

E. Chas. Blake,  
Pharmaceutical Chemist.

DEAR SIR,— At your request I have made a careful analysis and investigation of your "Perfection Tooth Powder." I find that it cleans the teeth exceedingly well, and that it is free from acids and other injurious ingredients.

I am, yours truly,  
KARL THEODORE STAIGER.

## TESTS FOR GOLD, SILVER, MERCURY, LEAD & COPPER.

**GOLD.**—Place a little of the ore (in fine powder) in a test tube or porcelain dish, and add to it a mixture of hydrochloric acid (4 parts), nitric acid (1 part), boil carefully; allow it to stand for a short time, then filter through thick blotting paper. To this solution add a few drops of Solution of Stannous chloride; if gold be present, even in the minutest quantity, the solution will show a purple coloring, which will be more pronounced if gold is present in larger quantities.

**SILVER, MERCURY, AND LEAD.**—Place a little powdered ore in a test tube or porcelain dish, add a small quantity of water, and a little nitric acid. Heat this for a short time and filter through blotting paper. To the clear solution add a little hydrochloric acid, if a precipitate be formed it is either chloride of silver, chloride of mercury, or chloride of lead. Pour off all the liquid and shake the precipitate with ammonia. If the precipitate is dissolved the ore contains silver, if it is blackened it contains mercury, and if it is unchanged it contains lead.

**COPPER.**—Heat a little powdered ore in a test tube or porcelain dish with water or Nitric Acid, filter through blotting paper. To the clear solution add ammonia in excess, if the solution become blue, there is copper in the ore.

By the above methods a rough estimate may be formed, but to obtain an accurate quantitative analysis is beyond the scope of the amateur, and should be left in the hands of a competent assayer.

**N.B.**—Care should be taken in using the acids, as they will destroy all fabrics with which they come in contact.

## PREVENTION OF INFECTIOUS DISEASES.

**WHEN** small-pox, cholera, diptheria, measles, typhoid, or scarlet fever has broken out in a house, the first thought should be to prevent its spread.

1. Separate the sick, without delay, from the rest of the household, by removal, where possible, or by complete isolation at the top of the house, with a sheet well wetted with disinfectant hung outside the bedroom door.

2. The room selected should be light and airy, and should have a fireplace.

3. Remove at once all the furniture that can be spared, and anything that may harbour dust, dirt, or infection.

4. Give strict orders that no communication be held with the sick room, except through the nurse, or some authorised person who has had the disease.

5. Examine house-drains, and water-closets, sinks, dust-bins, and any possible sources of nuisance; remedy defects, and disinfect freely. In times of epidemic the sewers should be disinfected.

6. Look to sources of water supply, house cisterns, water-butts, pumps, &c., for impurities and contaminations by sewage. Water which is clear and pleasant to the taste may still be charged with sewer poison.

7. Children living in an infected house should not attend schools or visit other houses.

8. Persons recovering from scarlatina should on no account be allowed to mix with their fellows until several baths have been taken, and the peeling is completed.

9. The bodies of persons who have died of fever are infectious, and should be carefully isolated. They should be buried with the least possible delay.

In the sick room nothing can replace fresh air, light and cleanliness. Scents are useless. Remove all superfluous furniture, carpet, curtains, hangings, &c., set everything in order, and clean up. If the room is not isolated, hang a sheet before the door outside, and keep well wet three or four times daily with Condly's Fluid or Carbolic Acid. Avoid stuff dresses. Keep within reach a

Blake's Electric Liniment price 2s. 6d. for rheumatism

basin with Condyl's Fluid to spit into : and, where there is no fire to burn them, a large basin to receive the squares of rags used in place of handkerchiefs, also some disinfectants for the utensils.

Disinfectants are poisons. Bottles containing them must be put away, and not allowed to stand with ordinary medicine bottles. Disinfect and remove as soon as possible all discharges from the body of the sick. Keep at hand a small tub or pan with disinfectants for receiving soiled linen. Pour disinfectants freely down sinks and water-closets. In scarlatina oil the body when the skin is peeling, twice daily, and use warm baths with soap. When sickness has come to an end, disinfect the room, and all that has been in contact with the invalid.

### POISONS AND THEIR ANTIDOTES.

Immediately it is known that a person has taken poison, send for medical assistance, if procurable, meanwhile lose no time, but proceed as follows :—

If the poison is *Sulphuric Acid*, *Nitric Acid* (Aqua Fortis) *Hydrochloric Acid* (Spirits of Salts, Muriatic Acid) give either of the following which may be nearest at hand. Carbonate of Soda (washing soda) or Carbonate of Potash, dissolved in water; chalk, magnesia, whiting, or whitewash (scraped from the wall), mixed with water to the consistency of cream, fluid magnesia, white of egg, oil, milk, linseed, tea, or large draughts of water if nothing else is at hand.

*Oxalic Acid*: Give chalk, whiting, or whitewash freely in water, afterwards an ounce of castor oil as an aperient.

*Carbolic Acid*: Give half-an-ounce of Epsom Salts, then an emetic, white of egg in water in large quantities, an ounce of castor oil, or half a tumblerful of salad oil.

*Ammonia*, *Soda*, *Potash* (Caustic Soda or Potash, Carbonate of Soda (washing soda) or Potash, pearl ashes, soap lees): Give drink containing vinegar or lemon juice, and olive or salad oil.

*Arsenic* (Rat Poison, Vermin Killer, Fly Killer): Give large quantities of milk and white of eggs, lime water, or flour water; then sugar and water, or linseed tea, castor oil. When the violent system are subdued, broth and other light diet.

*Corrosive Sublimate* and other mercurial poisons: Give white of egg, mixed with water, in unlimited quantity, milk, flour and water, arrowroot or gruel, if at hand, followed by an emetic.

*Copper* (Bluestone—food cooked in copper vessels): Give large quantities of milk and white of egg, then an emetic.

*Opium*, *Laudanum*, *Morphia*, *Belladonna* (Deadly Nightshade), *Hyoscyamus* (Henbane), *Stramonium* (Thorn Apple), *Tobacco*, or other narcotic poisons: Give an emetic immediately; keep the patient awake by walking about, flicking with a wet towel or alternate hot and cold douche on head and chest; give strong coffee. In all cases of vegetable poisoning give an emetic.

Either of the following emetics may be given where required. As time is of great importance the first to be obtained is the best:—(1.) Thirty grains of Sulphate of Zinc in water. (2.) Thirty grains of Powdered Ipecacuanha in water. (3.) Half to two tablespoonfuls of Ipecacuanha Wine in water. (4.) Two tablespoonfuls of common salt in half-a-pint of tepid water. (5.) A tablespoonful of mustard in half-a-pint of water. Warm greasy water will also induce vomiting.

When the poison has been neutralised or vomited stimulants may be given if required.

Clark's Fairy Lamps, from 1s to 20s each.
